Single conductor stranded tinned copper with white PVC insulation, white glass braid and a clear nylon jacket overall.

TYPE II — AN-10 THRU AN-0000

Single conductor stranded tinned copper with white PVC insulation, white glass braid, flame retardant nylon lacquered nylon braid overall.

DEARBORN

MIL-W-5086A-MIL-C-7078A
SHIELDED AIRCRAFT WIRE FOR ELECTRICAL SYSTEMS

BASE WIRE, MIL-W-5086A, TYPE I, MIL-C-7078A, TYPE I

Stranded tinned copper conductors, with color coded Polyvinylchloride insulation and a clear Nylon jacket on each conductor; cabled, with a braided tinned copper shield (85% coverage) overall.

BASE WIRE, MIL-W-5086A, TYPE II, MIL-C-7078A, TYPE I

Stranded tinned copper conductors, insulated with white PVC, color coded glass braid on each conductor. Each conductor has clear Nylon jacket over glass braid insulation. Conductors are cabled and have braided tinned copper shield (85% coverage) overall.

BASE WIRE, MIL-W-5086A, TYPE I, MIL-C-7078A, TYPE II

Same as MIL-C-7078A, Type I, Base Wire, MIL-W-5086A, Type I, with addition of a clear Nylon jacket over the shield.

BASE WIRE, MIL-W-5086A, TYPE II, MIL-C-7078A, TYPE II

Same as MIL-C-7078A, Type I, Base Wire, MIL-W-5086A, Type II, with addition of clear Nylon jacket over the shield.

GENERAL CHARACTERISTICS—Temperature rating: —55°C to +105°C. Voltage rating: 600 Volts. Resistant to effects of oil, water, hydraulic fuel, skydrol, aircraft fuels, ethyleneglycol, alcohol, dilute acids, alkalis, fungus, and abrasion.

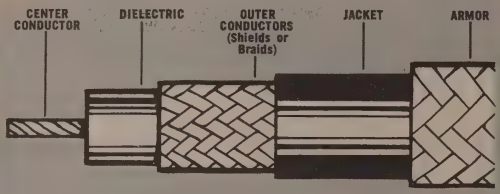
RG COAXIAL CABLE

Dearborn has the most complete selection of RG Coaxial Cable in the nation, manufactured to meet the needs of government and industry . . . backed by America's most dependable quality warranty.

Nomenclature



Operating Temperature Limits for Cable Jackets

MILITARY DESIGNATION	JACKET TYPE	TEMPERATURE LIMITS
TYPE I	Black Polyvinylchloride	−40°C to +80°C
TYPE II	Grey Polyvinylchloride	−25°C to +80°C
TYPE IIa	Black or Grey Polyvinylchloride	Under ¼" O.D. −55°C to +90°C Over ¼" O.D. −40°C to +90°C
TYPE IIIa	Black Polyethylene	−55°C to +85°C
TYPE IV	Black Synthetic Rubber	Under ½" −55°C to +80°C Over ½" −40°C to +80°C
TYPE V	Fiberglas Braid	−55°C to +250°C
TYPE VI	Silicon-Rubber Dacron Braid	−55°C to +175°C
TYPE VII	Teflon (PTFE)	−55°C to +250°C
TYPE VIII	Synthetic Rubber	−55°C to +75°C
TYPE IX	Teflon (FEP)	−55°C to +200°C

EXPLANATION OF NOMENCLATURE

CENTER CABLE CONDUCTORS

Center cable conductors may be solid or stranded wires, or in some cases, a tube. Selection is made on the mechanical and electrical properties desired. Solid wires result in lowest cable attentuation. Stranding permits increased cable flexibility but also increases attenuation. Bare, tinned, or silver plated copper wire is usually used for center conductors. Other materials are Copperweld, Cadmium Bronze, Aluminum, Nichrome and Karma.

DIELECTRICS (CABLE)

EXTRUDED POLYETHYLENE

Low cost, flexibility, ease of application, high dielectric strength and low dielectric constant make it well suited for RF applications. It is the most commonly used low temperature cable dielectric.

FOAM CORE (CELLULAR POLYETHYLENE)

An excellent low temperature dielectric formed by expanding polyethylene with millions of bubbles of an inert gas. Its low dielectric constant of 1.5 for Foam Core compared to 2.26 for solid polyethylene permits the design of lower attenuation and low capacity cables.

TEFLON

Teflon will withstand high temperature applications. It has high dielectric strength and a very low dielectric constant. Its ability to withstand exposure to gases and liquids makes it the dielectric selected where other materials would be inadequate.

CABLE OUTER CONDUCTORS

SHIELDS† OR BRAID

The outer conductor is usually made of a metal braid but it can be a solid tube. The braid is used where flexibility is a vital factor; the tubular construction is used where a high degree of shielding is required. Tubular construction also provides lower cable attenuation. Two adjacent braids offer better shielding action than one braid. Generally speaking braids are either copper, tinned copper or silver plated copper.

† Armor

CABLE JACKET TYPES

TYPE I (MIL-C-17)—Decription: Black Polyvinylchloride. **Characteristics:** Excellent weathering and abrasion properties, but is of the contaminating type and will cause cable attenuation to increase with age. Can be used for direct burial.

TYPE II (JAN-C-17A)—Description: Grey Polyvinylchloride. **Characteristics:** A semi-noncontaminating jacket.

TYPE IIA (MIL-C-17)—Description: Black or Grey Polyvinylchloride. **Characteristics:** Noncontaminating. Good weathering and abrasion resistant properties. Can be used for direct burial.

TYPE IIIA (MIL-C-17)—Description: Black Polyethylene. **Characteristics:** Moisture resistant, abrasion resistant, defies ultra violet damage. Noncontaminating; recommended for direct burial.

TYPE IV (MIL-C-17)—Description: Black Synthetic Rubber. **Characteristics:** This jacket material is used only on high voltage pulse cables. The basic material is polymerized chloroprene.

TYPE V (MIL-C-17)—Description: Fiberglas Braid. **Characteristics:** Impregnated with silicone varnish to provide abrasion resistance and a moisture seal.

TYPE VI (MIL-C-17)—Description: Silicone Rubber Dacron Braid. **Characteristiscs:** Two wraps of silicone rubber impregnated fiberglass tape which is fused into a homogeneous layer. A dacron braid is applied, followed by a high temperature fluorocarbon lacquer.

TYPE VII (MIL-C-17)—Description: Teflon (Polytetrafluordethyene). **Characteristics:** Either extruded or tape wrapped. Withstands high temperatures; chemically inert; insoluble in liquids and gases.

TYPE VIII (MIL-C-17)—Description: Synthetic Rubber. **Characteristics:** This material is a polychloroprene compound and is used with only a few pulse cables. Its primary use is as a jacket material for multiconductor cables.

TYPE IX (MIL-C-17)—Description: Teflon (Fluorinated Ethylene Propylene). **Characteristics:** Excellent weathering properties and chemically inert. Maximum operating temperature of 200°C.

LOW LOSS COAXIAL CABLE WITH (FOAM) CELLULAR POLYETHYLENE DIELECTRIC

Compared to ordinary RG/U cable of similar size, the attenuation of cellular polyethylene (Foam Core) dielectric cable is reduced by as much as 35%. These cables are well suited for CATV, Closed Circuit or MATV; ideal for use in amateur, commercial or citizen band installations. All are made to adapt to unusual terrain problems and resist damage from weather extremes.

WELDING CABLE

INDUSTRO-FLEX NEOPRENE WELDING CABLE

The Industro-Flex Neoprene series is a new development which utilizes No. 30 stranding. It has a smaller O.D. and still retains flexibility at lower prices than the standard Neoprene welding cable.

NEOPRENE AND RUBBER WELDING CABLES

These cables are constructed of stranded bare copper conductors, with a tape wrap and either a neoprene or rubber jacket overall as specified in tables below. All have extra fine stranding, are extremely flexible and have high resistance to abrasion, impact, flexing and twisting.

INDUSTRO-FLEX NEOPRENE WELDING CABLE

DEARBORN

SERVICE AND POWER CORDS-RUBBER NEOPRENE AND PLASTIC

U.L. LISTED & C.S.A. APPROVED

GENERAL CHARACTERISTICS

Temperature rating: −20°C to +60°C.

Voltage rating: Types SV, SVT, SJ, SJT, and SJO are 300 V rated; Type S and SO are 600 V rated. On SJO two types are listed: Stationary and Constant Service. Constant Service has more flexible stranding.

TYPES SV, SJ AND S/RUBBER CORD CONSTRUCTION

Conductors are stranded bare copper. Separator, color coded rubber insulation, cabled with fillers. Separator and tough rubber jacket overall.

TYPES SVT AND SJT PLASTIC CORDS

Types SVT and SJT are plastic insulated and plastic jacketed. Construction is same as SV and SJ. Jacket is black.

TYPES SJO AND SO/NEOPRENE CORD CONSTRUCTION

Conductors are stranded bare copper. Separator, color coded rubber insulation cabled with fillers. Separator and black neoprene jacket overall. Resistant to oil, grease, ozone, acid and moisture.

APPLIANCE AND FIXTURE WIRE

U.L. LISTED

SILICONE RUBBER TYPES

HIGH TEMPERATURE BRAIDLESS SILICONE RUBBER WIRE

Braidless silicone is easy stripping, and has excellent physical strength and mechanical properties. Recommended for stoves, dryers, motors and electronic devices where high temperatures are incurred. All conductors are of stranded tinned copper. U.L. Style 3212 — Sizes 10 thru 22; U.L. Style 3213 — Sizes 2 thru 8; U.L. Style 3214 — Sizes 00 thru 1.

HIGH TEMPERATURE SILICONE RUBBER WIRE WITH GLASS BRAID

High temperature silicone rubber insulation for easy stripping. Lacquered glass braid overall gives additional abrasion resistance. Lacquer prevents fraying of braid. Used for appliance and hookup wire. U.L. Style 3071 on AWG Sizes: Nos. 18, 16, 14, and 12. U.L. Style 3075 on AWG Size No. 10.

ASBESTOS INSULATED TYPES

TYPE AA. U.L. Style C-2130, 150°C; 300 Volts. Designed for wiring of electric ranges, grills, space heaters and other types of electrical heating devices where heat but not moisture is present. Maximum copper temperature is 200°C (392°F).

TYPE AF. U.L. Style AF 3200, 150°C; 300 Volts. Stranded copper conductor; tape, felted asbestos insulation — flame, heat and moisture resistant. Approved for all types of interior illumination, particularly fluorescent devices, and all high wattage units, especially where socket temperatures exceed 90°C (194°F).

STYLE 1007, U.L. HOOK-UP WIRE

Voltage rating: 300 Volts. Temperature rating: −10°C to +80°C. 1/64″ Polyvinylchloride insulation over stranded tinned copper.

STYLE 1061, U.L. SEMI-RIGID BUSINESS MACHINE WIRE

Voltage rating: 300 Volts. Temperature rating: −10°C to +80°C. .009″ Polyvinylchloride insulation over solid or stranded tinned copper.

"TEW" FLAME RETARDANT, FR-1 STYLES 1015, 1028, 1283, 1284 600 VOLT, 105°C AND FR-1 STYLE 1007, 300 VOLT, 80°C

The polyvinylchloride insulation used on this series has the necessary additives that enable the wire to pass the Vertical Flame Test as prescribed by the Underwriter Laboratories for this UL style. All this wire is imprinted with the symbol FR-1 indicating it is covered by the above specifications. See page 22 for high voltage Flame Resistant wire.

DEARBORN

THERMOPLASTIC INSULATED HOOKUP WIRE

U.L. AND C.S.A. APPROVED

X-L POLYETHYLENE, U.L. STYLES 3173, 3199, 125°C — 600 VOLT, 105°C — 300 VOLT

The Polyethylene insulation used on this series of lead wire is chemically cross-linked, which increases the moisture resistance, solvent resistance and aging characteristics. When momentary high temperatures caused by overloads or shorts occur, the insulation does not deform as quickly as if not cross-linked. Typical applications include small motors, control panels, dry transformers, etc. **Recommended maximum baking cycles:** 300°F for 24 hrs. — 325°F for 12 hrs. — 350°F for 8 hours.

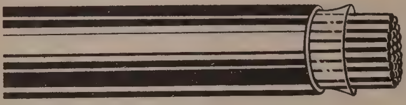
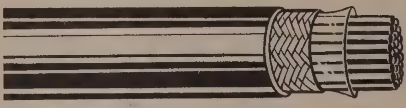
U.L. LISTED

COMPUTER TYPE MINIATURE CONTROL CABLES MULTI-CONDUCTOR STYLES 2343 AND 2344



MULTI-CONDUCTOR, UNSHIELDED



MULTI-CONDUCTOR, SHIELDED

The cables listed below, multiconductor, with or without shield are designed for computer use.

The individual conductors are stranded tinned copper. Numbers 22, 24 are 7 strand, No. 20 is 19 strand. Insulated with .010" wall of PVC to MIL-W-16878D Type B. On this usage, conductors are rated 105°C and 600 V. working voltage. The conductors also meet UL Style 1061, rated 80°C, 300 V. working voltage.

Conductors are cabled by the planetary method and laid contra-helically for best flexibility, with a Mylar tape barrier placed under shields. All shielded cables are of tinned copper braid overall of 85% - 90% coverage per MIL-C-7078.

The jacket over the shield is black 105°C Vinyl per MIL-I-631 Type F. All materials are fungus resistant and self extinguishing.

All items approved under UL STYLE 2343 or 2344* for computer usage: +80°C, 300 Volts. On non-UL service can be used at 40°C to +105°C, 600 Volts.

U.L. LISTED HIGH TEMPERATURE TEFLON* WIRE

U.L.
LISTED

Dearborn supplies a variety of high temperature insulated wires that are listed by the Underwriters Laboratories. The types shown here fall into the category of appliance wiring material (AWM) and are covered by the Flexible Cord and Fixture Wire Standard and UL Standard 758.1 for insulated single conductor appliance wiring material. Among a variety of requirements, the latter document assigns ratings regarding the duty group, flame retardance, temperature rating, voltage rating, service flexibility, resistance to abnormal temperature, oil resistance, water resistance and gasoline resistance where applicable. All of the following Underwriters styles are flame retardant and will satisfy the FR-1 designation of UL.

This section lists only the most commonly used conductors. In many instances, the Underwriter's Laboratories allow the use of other materials. Consult factory for further details.

UL STYLES 1164 AND 1180

CONDUCTOR: Silver plated copper. On special order nickel plated copper conductors are available. **INSULATION:** Extruded "Teflon" TFE, .013" min. (average) wall. **TEMPERATURE RATING:** UL 1180-200°C. **VOLTAGE RATING:** 300 volts rms. **USE:** For internal wiring of appliances, also suitable for immersion in gasoline, gasoline vapor and 80°C oil. **TEMPERATURE IDENTIFICATION MARKER:** UL 1164-Brown, UL 1180-Black. Dearborn standard temperature identification is a longitudinally applied stripe in size 18 AWG and larger. Sizes 20 AWG and smaller do not require temperature identification. Upon request and at an additional charge, surface printing can be provided.

UL STYLES 1198 AND 1199

CONDUCTOR: Silver plated copper. On special order nickel plated copper conductors are available under series 3XTN-UL. **INSULATION:** Extruded "Teflon" TFE, .020" min. (average) wall. **TEMPERATURE RATING:** UL 1198-150°C. UL 1199-200°C. **VOLTAGE RATING:** 600 volts rms, 2500 volts peak for electronic use. **USE:** Internal wiring of appliances, also suitable for immersion in gasoline, gasoline vapor and 80°C oil. **TEMPERATURE IDENTIFICATION MARKER:** UL 1198-Brown. UL 1199-Black. Dearborn standard temperature identification is a longitudinally applied stripe in size 18 AWG and larger. Sizes 20 AWG and smaller do not require temperature identification. Upon request and at an additional charge, surface printing can be provided. Consult factory for availability of sizes 1/0 thru 4/0.

UL STYLES 1212 AND 1213

CONDUCTOR: Silver plated copper. On special order, nickel plated copper or silver plated high strength high conductivity copper alloy conductors are available. **INSULATION:** Extruded "Teflon" TFE, .008" min. (average) wall. **TEMPERATURE RATING:** UL 1212 and UL 1213-105°C. **VOLTAGE RATING:** Not specified. **USE:** In office appliances where exposed to temperatures not exceeding 80°C or 105°C or to oil at temperatures not exceeding 60°C, and where not subjected to undue mechanical abuse. Temperature identification on the wire is not required on these styles. Consult factory for tracer or stripe on special.

DEARBORN

U.L.
LISTED

UL STYLES 1226 AND 1227

CONDUCTOR: Tin plated copper. Constructions with silver plated copper or silver plated high strength high conductivity copper alloy are available on request. **INSULATION:** Extruded "Teflon" FEP, .008" min. (average) wall. **TEMPERATURE RATING:** UL 1226-80°C. UL 1227-105°C. **VOLTAGE RATING:** Not specified. **USE:** In office appliances where exposed to temperatures not exceeding 80°C and 105°C or oil at temperatures not exceeding 60°C, and where not subjected to undue mechanical abuse. Temperature identification of the wire is not required for these styles.

UL STYLES 1330 AND 1331

CONDUCTOR: Tin plated copper. **INSULATION:** Extruded "Teflon" FEP. .020" min. (average) wall, sizes 26-10 AWG, .030" min. (average) wall, sizes 8-2 AWG **TEMPERATURE RATING:** UL 1330-200°C, may be used with tin plated copper conductors only where the individual strand diameter is .015" (26 AWG) or larger. UL 1331-150°C. **VOLTAGE RATING:** 600 volts rms. **USE:** For general appliance wiring where not subjected to temperatures exceeding 200°C for style 1330 (see above limiting note), or 150°C for style 1331. Suitable for immersion in gasoline, gasoline vapor and 80°C oil. Constructions with silver plated copper are available on request; this version has an unrestricted 200°C temperature rating for style 1330. For sizes 18 AWG and larger, temperature identification is indicated by a black marker thread for style 1330 and a brown marker thread for style 1331, located under the insulation. Sizes 20 AWG and smaller do not require temperature identification.

CSA APPROVED HIGH TEMPERATURE TEFLON APPLIANCE WIRE

CSA INSULATION REQUIRED MIN. AVG. WALL	CSA VOLTAGE RATING	CSA TEMPERATURE RATING DEGREES (C)	WIRE SIZES
.010	150	150	32-16
.016(1/64")	300	200	28-12
.031(1/32")	600	200	28-12

STANDARD WALL INSULATION RATED AT 300 VOLTS AND 200°C

CONDUCTOR: Silver plated copper; constructions with nickel plated copper or nickel conductors can be supplied. Consult factory for details. **INSULATION:** Extruded "Teflon" TFE, 1/64" (0.4mm) minimum wall thickness. Surface printed for product identification in sizes 24 AWG and larger. **USE:** For internal wiring of electronic, photographic, refrigeration and air conditioning equipment, ballast and incandescent lampholder leads, ovens, flood lights, business machines, clothes dryers and electric stoves.

STOCK COLORS: AWG SIZES 12 THROUGH 24 = 0-2-9. AWG SIZES 26 THROUGH 28 = 0-9.

THIN WALL INSULATION RATED AT 150 VOLTS AND 150°C

CONDUCTOR: Silver plated copper. Constructions with nickel plated copper or nickel conductor can be supplied. Consult factory for details. **INSULATION:** Extruded "Teflon "TFE, .010" (0.25mm) min. average wall thickness. Surface printed for product identification in sizes 24 AWG and larger. **USE:** For internal wiring of process control and computer equipment.

STOCK COLORS: AWG SIZES 16 THROUGH 24 = 0-2-9. AWG SIZES 26 THROUGH 32 = 0-9.

* For availability of other color and stripe combinations, consult factory.

HEAVY WALL INSULATION RATED AT 600 VOLTS AND 200°C

CONDUCTOR: Silver plated copper. Constructions with nickel plated copper or nickel conductor can be supplied. Consult factory for details. **INSULATION:** Extruded "Teflon" TFE, 1/32" (0.79mm) min. wall thickness. Surface printed for product identification in sizes 24 AWG and larger. **USE:** For internal wiring of electronic, photographic, refrigeration and air conditioning equipment, ballast and incandescent lampholder leads, infrared ovens, flood lights, business machines, clothes dryers and electric stoves.

STOCK COLORS: 0-2-9.

DEARBORN

MULTI-CONDUCTOR SHIELDED AND UNSHIELDED CONTROL CABLES

RUBBER OR NEOPRENE SHIELDED

RUBBER OR NEOPRENE JACKETED. Conductors of stranded tinned copper with color coded .020″ rubber insulation*. Cables with fillers; cotton wrapped; braided tinned copper shield. Cotton wrap and tough black rubber or neoprene jacket overall. Neoprene and rubber jackets are impact and abrasion resistant. Neoprene is recommended for outdoor use because of its oil, ozone, moisture and sunlight resistance. Used for control circuits, studios, audio circuits, etc. Designed to eliminate cross-talk and hum pick-up. **Temperature rating:** −20°C to +60°C.

* .040 on single conductor

PLASTIC — SHIELDED

PLASTIC JACKETED. Conductors of stranded tinned copper, with color coded .014″ thick Polyethylene insulation. Cabled with fillers; wrapped with rayon; shielded with braided tinned copper shield. Covered with chrome grey Polyvinylchloride jacket overall. **Temperature rating:** −20°C to +60°C. **Operating voltage:** 600 V.

RUBBER — UNSHIELDED

Stranded tinned copper conductors, color coded rubber insulation. Cabled with fillers; cotton wrapped; tough rubber jacket overall. These cables are extremely flexible and are suitable for heavy duty usage. **Temperature rating:** −20°C to +60°C. Insulation thickness on individual conductors is .020″.

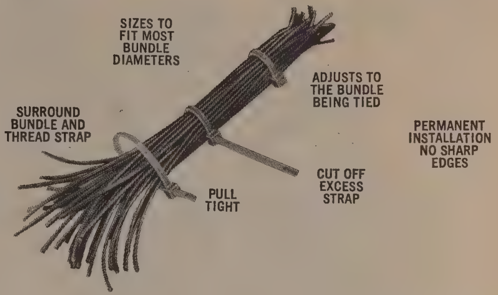
FASTRAPS™ CABLE TIES— SERIES 60

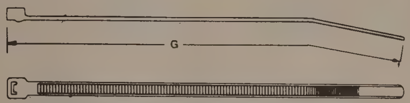
PERMANENT WIRE AND CABLE TIES THREE STYLES — EIGHT LENGTHS STANDARD AND HEAVY DUTY WEIGHTS

- HIGH DIELECTRIC STRENGTH, HIGH TENSILE STRENGTH AND OUTSTANDING RESILIENCE
- RESISTANCE TO ABSORPTION AND ABRASION, AND CHEMICAL DETERIORATION FROM SOLVENTS, OIL, GREASE
- MOLDED FROM NYLON — WHITE (NATURAL) IS STANDARD COLOR — OTHER COLORS AVAILABLE
- DESIGNED TO MEET MS-3367 AND MIL-S-23190

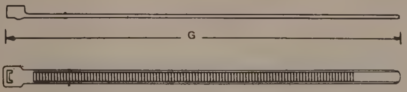


SIZES TO FIT MOST BUNDLE DIAMETERS
ADJUSTS TO THE BUNDLE BEING TIED
SURROUND BUNDLE AND THREAD STRAP
PERMANENT INSTALLATION NO SHARP EDGES
CUT OFF EXCESS STRAP
PULL TIGHT

FASTRAPS Bent Tip Cable Tie Designed for Easy Threading
Standard Duty
(Model 6005)



FASTRAPS Straight Tip Cable Tie . . . Provides Maximum Strength
Heavy Duty
(Model 6006)



FASTRAPS Cable Tie with Mounting Hole
Heavy Duty, Straight Tip (Model 6007) .250″ mounting hole
Standard Duty, Bent Tip (Model 6008) .205″ mounting hole

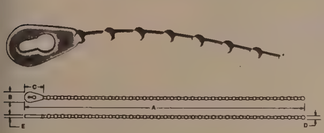
Color: NAT = White (Natural) Nylon Other colors available (50,000 pc. min. order)

Length: 0350 = 3½″, 0400 = 4″, 0550 = 5½″, 0675 = 6¾″, 1100 = 11″, 1400 = 14″, 2100 = 21″, 2800 = 28″

Basic Stem Number for FASTRAPS Type

REUSABLE, ECONOMICAL WIRE AND CABLE TIES



Stem No.	Material	Available Length (Dimension A Above)	Color Availability
6002	Nylon	4″, 5″, 6″, 8″, 10″	Natural
6003	Polyethylene	4″, 5″, 6″, 8″, 10″	Natural, Red, Yellow, Blue, Green in 10″ only

HOW TO ORDER

Stem No. - Length Color

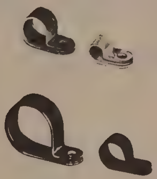
From chart, determines material and color.

Length (Dim. A), 0400 = 4″, 0500 = 5″, 0600 = 6″, 0800 = 8″, 1000 = 10″.

Red = Red, Yel = Yellow, Blu = Blue, Nat = Natural.

Example: 6003-0500 Yel Orders a Yellow Polyethylene beaded chain that is 5″ long.

SCREW-DOWN CABLE CLAMPS



HOW TO ORDER

Stem No. Bundle Dia. Dash. No. Color

From chart, determines material, width, thick., hole size.

From nom. bundle dia. Dash No. chart. (Note Limitations by Stem No.)

(Note limitations in Stem No. Chart.) Nat = Natural, Blk = Black, Amb = Amber.

Example: 6021-08-NAT orders a natural color nylon clamp, ⅜″ wide, with a .203″ hole size which will accommodate a bundle of wires ½″ in diameter.

Dash No.	Bundle Dia.	Dash No.	Bundle Dia.	Dash No.	Bundle Dia.	Dash No.	Bundle Dia.

FASTRAPS Convenience Clamps

Made of lightweight, durable, inert PVC. Adhesive backed for easy mount. Spring loaded — easy to use.

¾″ wide by .050″ nominal thickness. Accepts up to ½″ bundle diameter. Black only.

Part No. 6025-08-BLK

FASTRAPS Tie Mount

Molded nylon, mounting comes with adhesive back and screw hole.

Tie slips through slots and around bundle 1⅞₄″ square.

Accepts #6 screw. Accommodates ties up to .055″ x .190.

Part No. 6030-A-1

TM – Contour Cable is a trademark of Hughes Aircraft Company.

We specialize in flat cable and flexible circuit problems nobody else can crack.

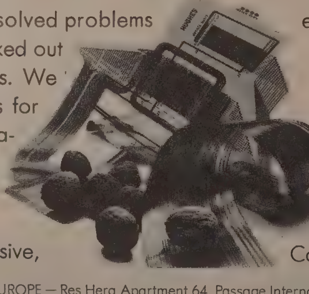
A lot of people make flat cable. A lot of people make flexible circuits. We're one of the few who make both.

But the big difference isn't only what we can manufacture, it's what we can design.

Hughes CONTOUR™ Cable solved problems for the Viking Mars probe. We worked out solutions for the Minuteman missiles. We cracked tough packaging problems for shipboard and airborne systems, radar, sonar, high-speed computers.

And we can crack your tough ones, too.

Not wild-eyed, super-expensive, forever-and-a-day solutions. Practical solutions. Maybe even less-expensive-in-the-long-run solutions.



And once we design it, we'll make it. In one of the industry's newest, most complete facilities.

Think of it this way. If it's simple and easy, anybody can do it, including us. But the tough nut is our specialty.

A tour? Or a consultation to discuss your design requirements? Just call (714) 549-5701 and ask for Dave Cianciulli. Or write: 17150 Von Karman Avenue, Irvine, California 92705.

NOTE: While PFA is not specifically called out in MIL-W-16878/D or MIL-W-22759, it will meet all the requirements of the specification where TFE is indicated. In addition, PFA can be extruded in long, continuous fault-free lengths since it is melt-extrudable.

FLEXLEAD Wire for Wire-Wrap Applications. Markel stocks Tefzel-insulated, silver-coated, solid copper conductor wire in the following sizes:

#24	AWG	0.0305 ± .0015
#26	AWG	0.027 ± .0015
#30	AWG	0.0195 ± .001

FLEXLEAD Fused Twisted Pair. This unique Teflon-insulated twisted pair construction finds wide application in computers and similar circuitry. The fusing, which will withstand predetermined pulls to separate the individual wires, keeps the wires evenly twisted for easier assembly and uniform capacitance and inductance. Ask for a test sample and prices.

FLEXLEAD MB Bondable Teflon. The Markel MB process can be factory-applied to any of the FLEXLEAD Teflon wires, extruded or tape-wrapped, and renders the surface bondable with commonly used elastomeric and epoxy-base potting and encapsulating compounds. Without affecting the color or electrical properties of the insulation, the MB treatment provides a bond with up to 150 psi pull-out strength, and a surface that is receptive to marking and printing.

FLEXLEAD Coaxial Cables. Markel manufactures a complete line of both standard and special RG/U coaxial cables. In accordance with specifications, types are available with silver-plated copper, plated or unplated copper-covered steel, or bare copper-center conductor; one or two braided shields; tape-wrapped Teflon shield guards; and outer jacketing of impregnated fiberglass braid or Teflon (extruded or tape-wrapped). For complete data, ask for a FLEXLEAD Coaxial Cable Specifications folder.

FLEXLEAD Special Constructions. Because wiring problems cannot always be solved with standard materials, Markel's capacity for engineering high-temperature wire and cable construction to meet particular needs has grown steadily with the demand. We can combine insulations—Teflon, silicone rubber, fiberglass, nylon-shielding, fillers, liners, and jacket materials—with single, twisted-pair or multiple conductors—to provide a special cable construction for any temperature range from —90° to 260°C. For more data ask for a FLEXLEAD Wire and Cable Selector.

Ask for data sheets, prices, and samples of FLEXLEAD wire constructions

Why National Wire?

As a manufacturer of wire and cable products . . . with warehouses on both East and West coasts, National Wire & Cable is ready to fill your immediate needs. Choose from our standard lines of wire or cable . . . OR let us design and custom manufacture exactly what you require for your application.

Our wire inventory is now over 160 million feet, and our 500 different standard multi-conductor cables total in excess of 1.3 million feet!

When you call National Wire, you'll find we are especially well equipped to handle your large as well as minimal requirements. If our "standard" items won't meet your application, we have the wire inventory, the machinery, the expertise to come up with exactly what you need. 86,000 square feet of manufacturing area and our expert engineering staff are at your disposal!! All cable components are produced within our own facility in order to assure complete quality control.

Review the following catalog pages. If you need some assistance with your specific requirement, call our factory direct, or call our representative nearest you.

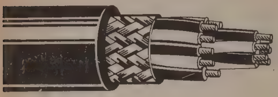
Miniature Signal & Control Cables Single Conductors (NX Series)



(NX1922J shown)

National Wire & Cable Corporation manufactures a complete line of MINIATURE low voltage signal and control cable. Available as cabled pairs or cabled singles, with optional overall shield. Conductors are stranded tinned copper with .010″ wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type B. Insulated for 600 volts working voltage. (Also meets U.L. AWM Type 1061; 300 volt, 80°C.) All are coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape barrier under shields. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078; and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C. vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. All items are U.L. LISTED STYLE 2343 COMPUTER CABLE; rated 80°C. (Higher temp. ratings apply for any non-U.L. service.)

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

IN STOCK

MIL - SPEC U.L. LISTED COMPUTER GRADE STYLE 2343

For light duty, gray jacketed version of these cables in the U.L. Style 2464, see Pages 2•2033-2•2036 NQ Series.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 5000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance from a wire to all else in a cable ranges from 45. to 70. pf/ft. at 1. kc, depending on gauge and position.
Insulation Leakage:	200. megohms/1000 ft. min. @ 500. VDC from any conductor to all else in cable.
Sheath Leakage:	10. megohms/1000 ft. min. @ 500 VDC from shield or conductor group through sheath to ground.
Temperature Range:	Suitable for continuous use from −40°C. to +105°C. (U.L. Service limited to +80°C.)
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6. cable diameters from +105°C. to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°C.

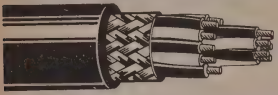
Heavy Duty Signal & Control Cables Single Conductors (NW Series)

IN STOCK

MIL-SPEC U.L. LISTED — STYLE 2343 & 2344



(NW1918SJ shown)

National Wire & Cable Corporation manufactures a complete line of multiple conductor control cable. Conductors are stranded tinned copper with 1/64" wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type C.* Insulated for 1000 volts working voltage. Color coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape serve over cable bundle. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078, and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C vinyl meeting MIL-I-631 Class F. All materials are self-extinguishing and fungus resistant. All cables are U.L. LISTED STYLE 2343; rated 80°C. (Higher temp. ratings apply to any non-U.L. service.) Specify polyurethane sheath for extreme rough usage or low-temp. service.

Standard Putups: 100, 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Insulated wires also meet U.L. style 1007 and CSA type TR-64.
† Denotes U.L. Style 2344.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 8000 volts AC RMS, 60 cps.
U.L. Voltage Rating:	300 volts RMS AC (appliance use). 600 volts RMS AC (electronic use).
Military Voltage Rating:	1000 volts RMS.
Capacitance:	Nominal capacitance from a wire to all else in the cable ranges from 40 to 65 mmfd per ft., @ 1000 cps; dependent on gauge and position.
Insulation Leakage Res.:	200. megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.
Sheath Leakage Res.:	10. megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.
Usable Temp. Range:	Suitable for continuous use from +105°C to −55°C.
Cold Bending Capability:	All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C. For continuous flexing applications consult factory.

Conductor sizes 22, 20, 18, 16, 14 & 12 gauge. 22 AWG is 7 strand. All others 19 strand.

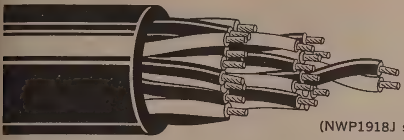
Heavy Duty Signal & Control Cables Twisted Pairs (NWP Series)



(NWP1918J shown)

IN STOCK MIL-SPEC
U.L. LISTED

Identical to National's NW-Series Cables except offered as twisted pairs.

National Wire & Cable Corporation manufactures a complete line of multiple pair control cables. Conductors are of tinned copper strand with 1/64" vinyl primary insulation for use up to 105° C per MIL-W-16878D Type C. Insulated for **1000** volts working voltage. Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per table below.

All pairs are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. The overall jacket is a 105°C black vinyl plastic per MIL-I-631; or may be Neoprene to MIL-R-6855 Class 2 Grade 60 specification. (Neoprene at added cost).

SHIELDED CABLES

National Multiple Conductor SHIELDED CABLES are to the same specifications as above with addition of tinned copper braided shield over cable complex with 85-90% coverage to MIL-C-7078A.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 8,000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance wire to wire for a pair ranges from 27. to 40. mmfd/ft. Capacitance from both wires tied together measured to all else in common ranges from 35. to 60. mmfd/ft. dependent on gauge and position. Overall shield has negligible effect on W-W capacitance.
Insulation Leakage Res.:	200. megohms / 1000 ft. min. at 500 VDC from any conductor to all else in cable.
Sheath Leakage Res.:	10. megohms / 1000 ft. min. at 500 VDC from overall shield through sheath to outside world.
Usable Temp. Range:	Suitable for continuous use from +105°C to −55°C.
Cold Bending Capability:	All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C. For continuous flexing applications consult factory.

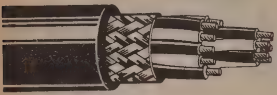
Extra Heavy Duty Control Cables Single Conductors (NWH Series)



(NWH1916SJ shown)

National Wire & Cable Corporation manufactures a complete line of extra heavy duty multi-conductor control cables. Conductors are of tinned copper strand with ½₂" wall of polyvinylchloride primary insulation for use up to 105°C.

Insulated conductors meet all of the following specs:†

MIL-W-16878	Type D	3000 volts working
Underwriters Lab.	Type 1015	2500 VOLT ELECTRONIC USE 600 VOLT APPLIANCE USE
I.P.C.E.A. *	Spec. S61-402	600 volts working

Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per MIL-STD. 681.

All conductors are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. The overall jacket is a 105°C black polyvinyl chloride Thermoplastic meeting I.P.C.E.A. S61-402 and MIL-I-631 Class F; or may be Neoprene to MIL-R-6855 Class 2 Grade 60 specification. (Neoprene at added cost).

SHIELDED CABLES

National Multiple Conductor SHIELDED CABLES are to the same specifications as above with addition of tinned copper braided shield over cable complex with 85-90% coverage to MIL-C-7078A. STANDARD PUT-UPS: 500 ft. and 1000 ft. No-deposit reels.

MIL-SPEC & I.P.C.E.A.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 12,000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance from a wire to all else in the cable ranges from 40 to 65 mmfd per ft., @ 1000 cps; dependent on gauge and position.
Insulation Leakage Res.:	200. megohms / 1000 ft. min. at 500 VDC from any conductor to all else in cable.
Sheath Leakage Res.:	10. megohms / 1000 ft. min. at 500 VDC from overall shield through sheath to outside world.
Usable Temp. Range:	Suitable for continuous use from +105°C to −55°C.
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C. to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°C. For continuous flexing applications consult factory.

MULTI-CONDUCTOR STOCK CABLES

Conductor sizes 22, 20, 18, 16, 14 & 12 gauge. 22 AWG is 7 strand. All others 19 strand.

---

* All cables meet commercial I.P.C.E.A. Spec. S61-402 for 600. volt service.

† Commercial voltage ratings are very conservative.

NATIONAL WIRE AND CABLE CORPORATION

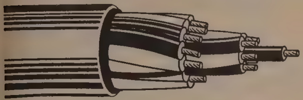
Miniature Signal & Control Cables Single Conductors (NQ Series)

EXTRA FLEXIBLE — GRAY PVC JACKET



(NQ1928J shown)

GRAY PVC JACKET

National Wire & Cable Corporation manufactures a complete line of highly flexible micro-miniature low-voltage instrument control cable. These are available as cabled pairs or singles, with optional overall shield of either foil with drain or a braided shield.

Conductors are stranded tinned copper with .010″ wall of tough extruded polyvinyl chloride primary insulation, rated for 300 volt use at +80°C under U. L. listed style 1061.* All are color coded using ten standard colors plus white with stripes per MIL-STD-681. Coded pairs use the same sequence as type NXP and NWP.

Conductors are planetary cabled and helically laid for optimum flexibility, with a barrier under braids. Shielded cables have a tinned copper braid of 90% coverage per MIL-C-7078, with braid angles below 40° for easy pushback; or have a 100% coverage foil shield in intimate contact with a drain wire for easy termination. See Section 3 of our master catalog for relative shield effectiveness.

Outer jacket is highly flexible abrasion-resistant gray polyvinyl chloride thermoplastic, meeting the requirements of U.L. listed style 2464.**

All materials are flame retardant and fungus resistant.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Wire also meets MIL-W-16878 type B, rated 600 volts, +105°C.

** Jacket material is military rated for +105°C; meets MIL-I-631, Class F.

MIL-SPEC & U.L. LISTED STYLE 2464

TECHNICAL DATA (all cables)

Insulation breakdown voltage:	Greater than 3000 volts AC RMS, 60cps.
Capacitance:	Nominal capacitance from a wire to all else in a cable ranges from 25 to 45 pf/ft at 1kc, depending on gauge and position.
Insulation Leakage:	200 megohms/1000 feet minimum @ 500VDC from conductor to all else in cable.
Sheath Leakage:	10 megohms/1000 feet minimum @ 500VDC from shield or conductor group through sheath to ground.
Temperature Range:	U.L. rating: +80°C per U.L. style 2464. Military: Continuous use from −40°C to +105°C.
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°. For continuous flexing applications consult the factory.
Foil Shielded Cables:	The nominal overall diameter of foil shielded cables will be .006″ greater than the non-shielded cables of the same conductor count and wire size.
Characteristic Independance: (NQP Paired Cables)	Ranges from 150 ohms to 45 ohms, dependent on wire size (AWG), geometry and drive method. Consult our technical staff for data on specific cable types.

Miniature Signal & Control Cables Twisted Pairs (NQP Series)

EXTRA FLEXIBLE — GRAY PVC JACKET

(NQP1928J shown)

MIL-SPEC & U.L. LISTED

STYLE 2464

GRAY PVC JACKET

National Wire & Cable Corporation manufactures a complete line of highly flexible micro-miniature low-voltage instrument control cable. These are available as cabled pairs or singles, with optional overall shield of either foil with drain or a braided shield.

Conductors are stranded tinned copper with .010" wall of tough extruded polyvinyl chloride primary insulation, rated for 300 volt use at +80°C under U. L. listed style 1061.* All are color coded using ten standard colors plus white with stripes per MIL-STD-681. Coded pairs use the same sequence as type NXP and NWP.

Conductors are planetary cabled and helically laid for optimum flexibility, with a barrier under braids. Shielded cables have a tinned copper braid of 90% coverage per MIL-C-7078, with braid angles below 40° for easy pushback; or have a 100% coverage foil shield in intimate contact with a drain wire for easy termination. See Section 3 of our master catalog for relative shield effectiveness.

Outer jacket is highly flexible abrasion-resistant gray polyvinyl chloride thermoplastic, meeting the requirements of U.L. listed style 2464.**

All materials are flame retardant and fungus resistant.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Wire also meets MIL-W-16878 type B, rated 600 volts, +105°C.

** Jacket material is military rated for +105°C; meets MIL-I-631, Class F.

TECHNICAL DATA (all cables)

Insulation breakdown voltage:	Greater than 3000 volts AC RMS, 60cps.
Capacitance:	Nominal capacitance from a wire to all else in a cable ranges from 25 to 45 pf/ft at 1kc, depending on gauge and position.
Insulation Leakage:	200 megohms/1000 feet minimum @ 500VDC from conductor to all else in cable.
Sheath Leakage:	10 megohms/1000 feet minimum @ 500VDC from shield or conductor group through sheath to ground.
Temperature Range:	U.L. rating: +80°C per U.L. style 2464. Military: Continuous use from —40°C to +105°C.
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to —20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at —40°. For continuous flexing applications consult the factory.
Foil Shielded Cables:	The nominal overall diameter of foil shielded cables will be .006" greater than the non-shielded cables of the same conductor count and wire size.
Characteristic Independance: (NQP Paired Cables)	Ranges from 150 ohms to 45 ohms, dependent on wire size (AWG), geometry and drive method. Consult our technical staff for data on specific cable types.

Digital Data Transmission Cables (D-200 Series)

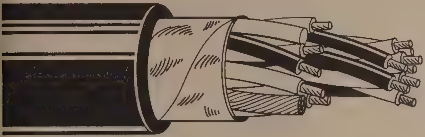
Low Voltage Computer Cable

Manufactured by our affiliate,
Dynatronic Cable Engineering Corp.

THE D-200 SERIES CABLES ARE MULTIPLE-PAIR FLEXIBLE CABLES DESIGNED FOR TRANSMISSION OF DIGITAL PULSE SIGNALS BETWEEN A COMPUTER AND ITS PERIPHERAL EQUIPMENT.

UL LISTED
U.S. Pat. No. 3489844

D-200 XX (XX designates number of pairs)



D-200 XXRF

DESIGN FEATURES OF THE D-200 SERIES DIGITAL DATA CABLE

Unlike conventional flexible cable construction, the primary features offered by the D-200 series data cable are the high and accurately controlled characteristic impedance of every pair, regardless of its position in the cable and special geometry chosen to reduce crosstalk.

ADVANTAGES

1. Less crosstalk and noise from mismatched loads, due to proper matching.
2. Uniform light loading on drivers allows direct I.C. drive, accurate prediction of current demands from power supply, and driver power dissipation.
3. Proper load match reduces re-flection and inversion noise where driver end is not matched to line. (Typical of TTL.)
4. Special geometry and pair construction provides exceptionally close capacitance balance between pair wires, reducing differential crosstalk.

USAGE

We recommend use of balanced drive and differential-input line receivers for lowest crosstalk and best pulse-reduction, utilizing the 110 ohm balanced impedance of the pairs. With such a system, TTL and MECL speeds have been used on D-200 cable at 1 mc data rates over 1000 ft.

Where the system is single-ended drive and receive, all pairs exhibit the 78 ohm impedance. Since these line receivers cannot discriminate between noise and the desired signal, crosstalk limits the cable distance over which transmission is reliable. Typical runs for DTL having 50 ns risetimes are 200 ft. Where risetimes can be slowed to longer than 100 ns, run lengths are practical to 500 ft. Without differential line reception, runs over 500 ft are not recommended for D-200 cable due to external noise aspects.

The D-210 series cable are recommended for high noise or long-run application. (Utilizing individual shields.)

Although use of balanced drive and differential line reception will avoid most noise problems, there are some installations where the expected external noise is unknown but assumed to be very great. Here, the use of data cables having individually-shielded pairs may be considered as conservative engineering practice. The assurance of a lower received noise may justify the increased size, cost and risetime.

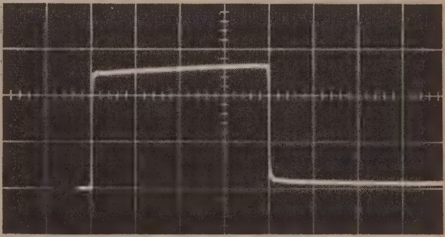
For these high noise-long run applications, Dynatronic Cable Engineering Corp has developed the D-210 series data cables. Electrical performance is essentially the same as the D-200 series cables, which use only an overall shield. An overall tinned-copper shield braid may be specified on either series by the suffix -RF on the part number. Standard D-200 shield is aluminum-mylar foil.

For runs of 1000-5000 ft. or where extra-fast output pulse risetime is required, we offer the D-220 series cable: a larger version of the D-200 series having improved transmission properties with sufficient mechanical strength for long pulls in conduit. Consult factory for technical data.

PULSE TRANSMISSION LOSS in D-series data cables causes a moderate amplitude loss, with definite rounding of the leading and trailing edges from 50% to 90% amplitude. The photos below (for a 1.25 megabit clock rate) show typical waveforms. The D-220 and D-222 series cables offer even lower losses than the D-200 or D-210 cables for long-run or fast-clocked applications.

Contact our factory engineering staff for detailed pulse-shape versus distance information, or for special applications.

INPUT PULSE



Horizontal: 200. ns/cm
Vertical : 2. volts/cm

OUTPUT PULSE at 500.FT.

Military & U.L. RFI Shielded Pair Cables (NTP Series)

(NTP722J shown)

MEETS U.L. STYLE 2343 OR 2344 FOR COMPUTER USE.

INDIVIDUALLY SHIELDED & JACKETED PAIRS

National Wire & Cable Corporation manufactures a complete line of flexible multi-pair cables in which each pair is individually twisted, shielded and plastic-jacketed.

Provides a minimum of crosstalk between signal channels, plus complete isolation between shields. Excellent for analog signals. All jackets moisture-proof. Suitable for use in duct, conduit, aerial or burial installations.

Conductors are stranded tinned copper with .010″ vinyl primary insulation, plus .004″ nylon insulation over the vinyl per MIL-W-16878 Type B. Insulation for 600 volts working rating at 105°C. Color coded: White and black (all conductors are 19 strand.)

Shielding is tinned copper braid with 90% minimum coverage per MIL-C-7078, and shield angle below 40 degrees for easy push-back.

Jackets over shields are extruded 105°C white polyvinyl chloride plastic per MIL-I-631, Class F; Color coded with stripes per MIL-STD-681, starting with 9.

All pairs are planetary cabled and contra-helically laid with a mylar tape serve over the cable bundle. The overall sheath is abrasion-resistant black 105°C vinyl thermoplastic per MIL-I-631, Class F.

Optional overall shielding of cabled bundle is 90% minimum coverage of tinned copper braid applied per MIL-C-7078 over the tape serve under sheath.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

TECHNICAL DATA

Insulation Breakdown Voltage: Greater than 5000 volts RMS, 60 hz.

Capacitance: (mmfd/ft.)

AWG	Wire-Wire	Wire-Shield
22	37	64
20	44	77
16	55	96

Insulation Leakage Resistance: 200 Megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.

Sheath Leakage Resistance: 10 Megohms/1000 ft. min. at 500 VDC from overall shield through sheath to saline bath at 25°C.

Usable Temperature Range: Suitable for continuous use from +105°C to −55°C when stationary. Flexing service: +105°C to −25°C.

Cold Bending Capability: All cables are suitable for bending to a circle diameter of 8 cable diameters from +105°C to −20°C. Recommended flex diameter should be greater than 20 cable diameters at −40°C.

Crosstalk: Common-mode, adjacent pairs: Worst case, −50 db @ 1 mhz; falling to −100 db below 100 khz. (Ref. MIL-C-23437 for test method.) For 100 ft. test length.

High Temperature "Teflon®" Insulated Cables (NZ Series)

MIL-SPEC FOR ROUGH USAGE & EXTREME ENVIRONMENTS

National Wire & Cable Corp., manfactures a standard line of TEFLON®-INSULATED multi-conductor signal and control cables designed for extreme environments and rough usage.

Construction is widely used in aerospace and industrial applications requiring a near-ultimate in cable physical and electrical performance plus high reliability.

Conductors are stranded silver-plated copper, insulated with .010″ of extruded TFE Teflon®; rated at 600 volts working from −65°C to +260°C per MIL-W-16878 Type E. Conductors are color coded using 10 standard colors plus spiral stripes on white per MIL-STD-681. (All conductors are 19 strand.)

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape wrap over the cabled bundle. The outer sheath is abrasion-resistant black Neoprene per MIL-S-6855, Class 2, Grade 60.

Optional overall shield is a 90% coverage tinned copper braid over the tape wrap per MIL-C-7078.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

® Trademark, E. I. Dupont Co.

TECHNICAL DATA

Insulation Breakdown Voltage: Greater than 4000 volts RMS, 60 hz.

Capacitance: Nominal capacitance from a wire to all else in cable ranges from 25 to 45 mmfd/ft. dependent on gauge and position in cable bundle.

Insulation Leakage Resistance: 5000 Megohms per 1000 ft.; minimum from any wire to all else in cable.

Sheath Leakage Resistance: 20 Megohms/ft. minimum; from shield through sheath to saline bath after 24 hr. at 25°C.

Usable Temperature Range: Suitable for continuous use from −55°C to +75°C in flexing service or stored.

Cold Bending Capability: All cables are suitable for bending to a circle diameter as small as 4 times their diameter from −55°C to +75°C. Continuous flexing to less than 6 times diameter is not recommended below −40°C.

General Performance: All materials are self-extinguishing after exposure to flame. Non-nutrient to fungus. Highly resistant to ozone, oils, mild acids and bases, high humidity.

Phone (213) 225-5611, TWX: 910-321-4155, Fed. Stock Code H4-04569

Complete Wire & Cable Mill Facilities To Meet Your Needs!

TRY OUR SERVICE, AND SEE!

NATIONAL WIRE & CABLE CORPORATION IS UNIQUE AMONG THE LEADING MANUFACTURERS OF CONTROL AND INSTRUMENTATION CABLE FOR THE ELECTRONIC AND AEROSPACE INDUSTRY. **UNIQUE, DUE TO OUR HUGE WIRE INVENTORY** — OVER 100 MILLION FEET IN STOCK — WHICH ALLOWS VERY RAPID DELIVERY OF CABLE, AND EXCELLENT SERVICE TO OUR WIRE CUSTOMERS.

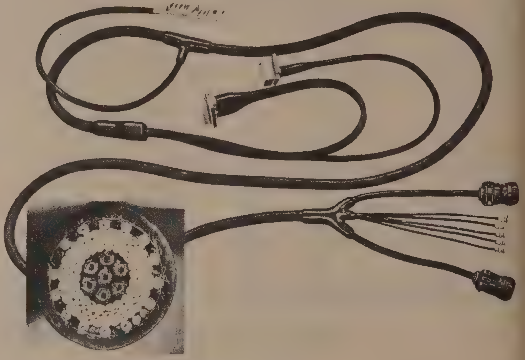
Custom Made Cable to Your Specifications

AVAILABLE PROMPTLY — AND AT LOWER COST THAN YOU MAY SUPPOSE—BECAUSE NATIONAL WIRE HAS:

1. The organization & experience to handle short-runs or rush schedules with consistent quality
2. All types of mill machinery for fabricating cable and all intermediate operations.
3. An enormous wire inventory to draw from for material for your cable (over 100 million feet in stock)
4. Technical consultants to aid you in properly specifying your cable needs and construction

COMPLETE FACILITIES FOR FABRICATING ALL CONSTRUCTIONS

- COPPER CONDUCTOR FABRICATION
- CONDUCTOR INSULATION EXTRUSION
- INSULATION CODING & STRIPPING
- ELECTRICAL SHIELDING
- TWISTING & SUBCABLE FABRICATION
- PLANETARY CABLE FABRICATION
- CABLE SHEATH EXTRUSION
- CABLE ASSEMBLY FABRICATION



Mr. DESIGNER: May we suggest

A. Request a copy of our complete Master Catalog. Write to us on your company letterhead or phone us directly in Los Angeles with your request
Then . . .

B. Check our catalog section and the instrumentation cable section for any of our standard stock cables which may meet your needs.

C. Review our cable designer's check list in the "Technical Information" section of the Master Catalog. Note any topics on which you may need information or recommendations.

D. Call National Wire & Cable Corp. (213-225-5611) and discuss your needs with our Technical Consultants. They speak your language and will have the answers you need.

E. Our Consultants will assist you in design, obtain cost and delivery information, and provide formal quotations and drawings, and assist with sales and procurement liaison.

F. Send us your prints for your custom cables for review and quotation. Where necessary, National Wire and Cable will provide engineering at no cost to fit your needs.

CONTACT NATIONAL WIRE & CABLE CORPORATION OR OUR REPRESENTATIVE FOR ACTION

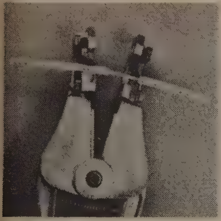
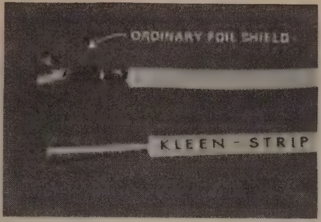
Nafoil Kleen-Strip® Foil-Shielded Audio & Instrumentation Cables (NKS Series)





COMPUTER GRADE U.L. LISTED SELF-STRIPPING FOIL SHIELD

Self stripping feature saves preparation time . . . increases production.

National Wire and Cable Corporation manufactures a full line of small shielded instrumentation cables using our "NAFOIL KLEEN-STRIP self stripping foil shield construction, plus non-fraying NABOND bonded stranded conductors.

Since the foil shield of "NAFOIL KLEEN-STRIP" is integrally fusion-bonded to the cable jacket, stripping the jacket from the end of the cable automatically removes the foil shield in the same operation.

This eliminates hand untwisting and trimming of foil shields. Excellent for automatic machine srtipping.

Insulated conductor and "drain" wire use National's "NABOND" bonded stranded wire which eliminates frayed wire ends. The "NABOND" process lightly bonds the tinning of all strands. "NABOND" wire acts like a solid wire during stripping and wiring operations. Subsequent flexure breaks the bonding and the wire returns to its flexible condition. Offers the convenience of solid wire during manufacture, with the reliability of stranded wire for normal use.

All wires are stranded, bonded, tinned copper with .010" vinyl insulation for use up to +80.C @ 300 volts (U.L. Style 1061). Also rated 105.C @ 600 volts per MIL-W-16878/1.

Foil shield is ½ MIL Mylar with .00035" Aluminum, 50% overlap. Bare drain wire is the same as used in insulated conductors.

Overall jacket is 105 C. polyvinyl chloride thermoplastic per MIL-I-631 Class B and exceeds U.L. requirements. Jacket wall thickness .031". For extra flexible applications, these cables are also available with .002 jacket wall.

TECHNICAL DATA

U.L. Voltage Rating:	300. Volts RMS AC (U.L. Style 1061)
Military Rating:	600. Volts RMS AC (Mil-W-16878/1)
Breakdown Voltage:	Greater than 3000. Volts RMS AC
Insulation Leakage Resistance:	Higher than 200. Megohms per 1000 ft at 500. V.D.C. from any conductor to all else.
Jacket Leakage Resistance:	Higher than 10 Megohms per 1000 ft at 500. V.D.C. from shield through Jacket to water bath.
Capacitance:	See Table Below.
Shield Leakage Capacitance:	Nominal "Look-Through" capacitance from conductor group through the shield to water bath is less than 2.pf/1000 ft. Reinforcing action of bonded jacket reduces "Window" effects caused by flexure.
Usable Temp. Range:	U.L. +80° Military: −40° to +105°C
Cold Bend:	All cables are suitable for flexing to a circle diameter of approx. 6 cable diameters from +80°C to −40°C.

AN AFFILIATE OF NATIONAL WIRE & CABLE CORPORATION

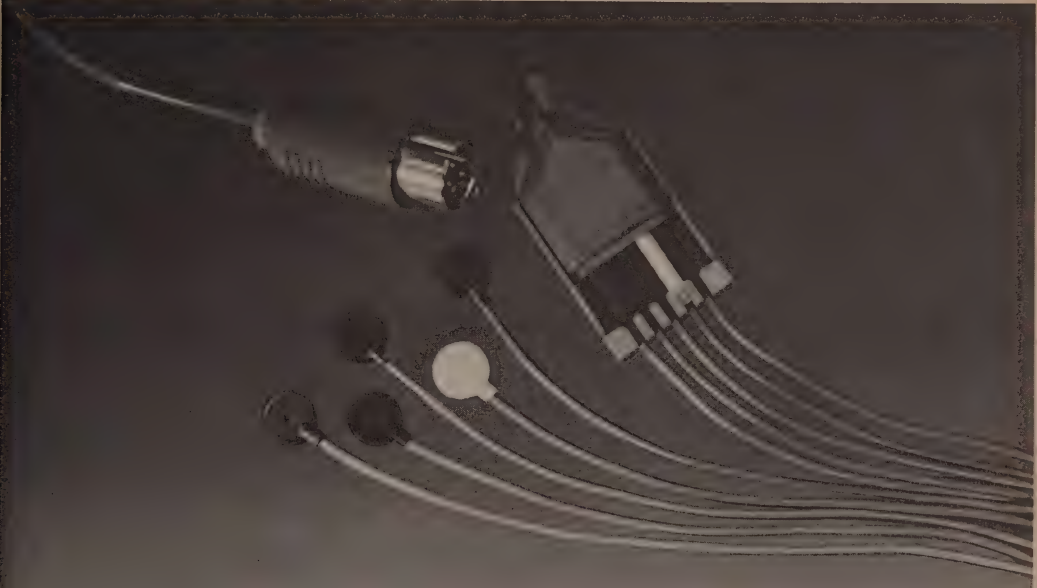
Molded Instrumentation Cables for all Types of Medical & Electronic Applications



SPECIALISTS IN INJECTION-MOLDING OF CONNECTORS DIRECTLY ONTO CABLE!

INTEGRAL-MOLDED ELECTRONIC CABLE/CONNECTOR ASSEMBLIES

Utilizing integral cable molding techniques, National Cable Molding Corporation (NCM) manufactures all components "in-house" from wire insulation to cable manufacture, connector assembly, tooling and molding the entire unit ready for use!

Write or call Mr. Frank W. Motley today for technical information or assistance. Phone: (213) 225-5611.

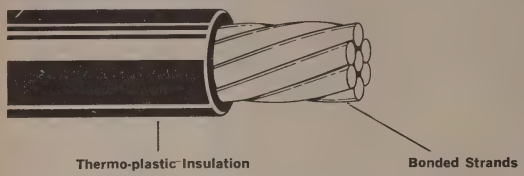
Nabond® Bonded Stranded Electronic Hookup Wire



Colors: 10 standard colors plus tracers on solid colors.

A NABOND* STRANDED CONDUCTOR IN YOUR WIRE ELIMINATES PRE-TINNING BEFORE FORMING WIRE TO A TERMINAL.

1. **Forms just like a solid wire . . . no loose strands.**
2. **Extra tinning ensures better soldering.**
3. **Absolutely smooth and round . . . NOT just a tin dip coat.**

WHAT IT IS:

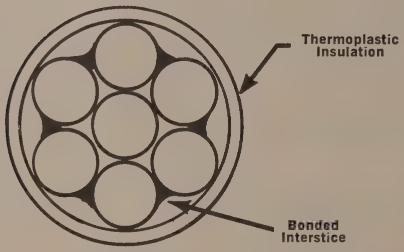
NABOND is a special bonding technique used on the tinned stranded copper conductors in an insulated wire.

The tinning on NABOND strands is slightly heavier than regular. The strands are cabled into a bundle to form the conductor. The conductor is then passed through a special process which lightly bonds the tinning on each strand. The resulting conductor is still smooth and round, yet may be formed as though it were a solid wire, without pre-tinning normally needed to hold the strands.

With repeated flexing, Nabond strand-bonds break free, allowing the stranded conductor to return to its flexible condition.

NABOND is available with either 600 or 300 volt insulation for U.L. service. NABOND exceeds U.L. Appliance Wiring Material requirements for copper conductors.

NABOND ELIMINATES PRE-TINNING!



NABOND is a wire identical to U.L. wires, except that the tinned strands are bonded together.

Pre-tinning is not required before soldering or forming. NABOND strand is smooth and flexible, yet is as easy to form and solder as a solid wire.

U/L Listed Wire

CSA Listed Wire

- Wires listed by the Underwriter's Laboratories, Inc. for operation in an air or an oil environment. U.L. File #E35793.
- Wires listed by the Canadian Standards Association for radio or electronic uses. CSA File #LR-20482

U/L Style 1061

Appliance wiring material available as FR-1 rated 80-degree C Service. .009" semi-rigid vinyl insulation U/L rated: 300-volt service. Meets Mil W-1687D Type B.

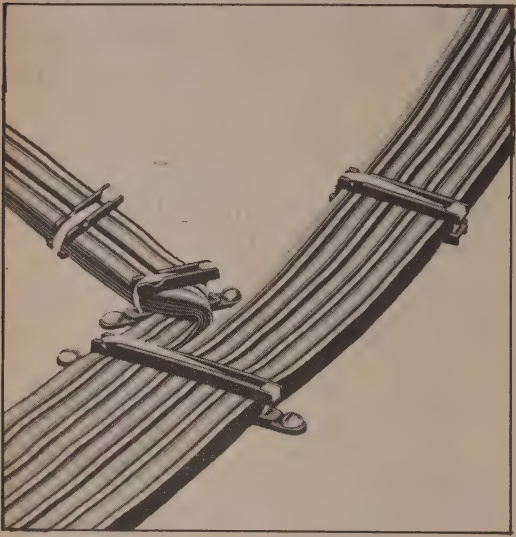
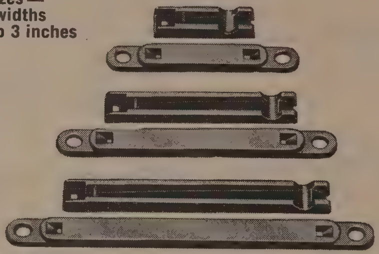
PANDUIT® wiring components

PANDUIT® FLAT CABLE MOUNT *

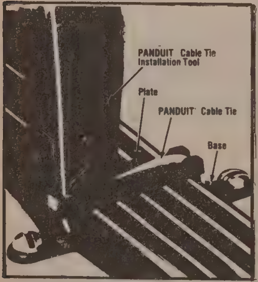


Combination of PANDUIT® Cable Tie and unique Flat Cable Accessory provides . . . secure method of mounting or bundling flat cable

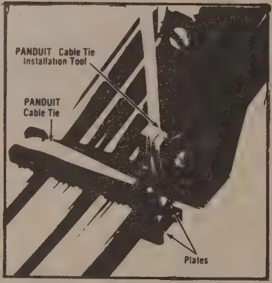
3 sizes — for widths up to 3 inches



MOUNTING APPLICATION



BUNDLING APPLICATION



- Secures stacked cables, folds, and breakouts
- Secures laminated and molded bus bars
- Available in 1″, 2″ and 3″ widths — accommodates flat cable widths of 0-3″
- Secure location of flat cables reduces variations in transmission characteristics such as crosstalk, impedance and capacitance
- Can be used in applications where vibration and strain is a factor
- Strong, 100% nylon — safe, will not damage the flat cable
- Removable and reusable
- Can be used with any type of flat cable

* Patent Pending

SELECTION CHART FOR PANDUIT® FLAT CABLE MOUNTS and PAN-TY® CABLE TIES

For Flat Cable Width (up to)	FOR MOUNTING† Use one (1) each of the following and one (1) cable tie	FOR BUNDLING Use two (2) each of the following and one (1) cable tie	MAXIMUM FLAT CABLE STACK HEIGHT (inches)			
			PANDUIT PAN-TY PLT1.5I Cable Tie	PANDUIT PAN-TY PLT2I Cable Tie	PANDUIT PAN-TY PLT3I Cable Tie	PANDUIT PAN-TY PLT4I Cable Tie
1″	FCPI1 FCBI1(-S10 or -A)	FCPI1	.8	2.0	3.7	5.2
2″	FCPI2 FCBI2(-S10 or -A)	FCPI2	—	1.0	2.7	4.2
3″	FCPI3 FCBI3(-S10 or -A)	FCPI3	—	—	1.7	3.2

Can be mounted with screws or commercial adhesive.

† For base with #10 screw hole use suffix -S10. For base to be mounted with commercial adhesive (supplied by user) use suffix -A.

PANDUIT® wiring components

PAN-TY® CABLE TIES

- One-piece, all nylon. No twisting; no metal barbs.
- Self-locking types — hand or tool installed; or releasable types — hand applied.
- Curved tip for faster harnessing.

CABLE TIES

Cat. No. & Cross-section	Bundle Dia. Min./Max.	Approx. Length
PLT1M Miniature Tie	1/16"-¾"	3⅞"
PLT1.5M Miniature Tie	1/16"-1¼"	5½"
PLT1.5I Intermediate Tie	1/16"-1¼"	5½"
PLT2M Miniature Tie	1/16"-2"	8"
PLT2I Intermediate Tie	1/16"-2"	8"
PLT2S Standard Tie	1/16"-1¾"	7¼"
PLT3I Intermediate Tie	1/16"-3"	11½"
PLT3S Standard Tie	1/16"-3"	11½"
PLT4I Intermediate Tie	1/16"-4"	14½"
PLT4S Standard Tie	1/16"-4"	14½"
PLT4H Heavy Tie	3/16"-4"	14½"
PLT8H Heavy Tie	3/16"-9"	30⅝"

CLAMPS

PLC1M-S4 Miniature Clamp	1/16"-¾" #4 Screw	4⅜"
PLC1.5I-S8 Intermediate Clamp	1/16"-1¼" #8 Screw	6⅛"
PLC2S-S6 Standard Clamp	1/16"-1¾" #6 Screw	7½"
PLC2S-S10 Standard Clamp	1/16"-1¾" #10 Screw	7⅛"
PLC4H-S25 Heavy Clamp	3/16"-4" ¼" Screw	15¼"

- Low profile design.
- Complete line of cable ties, clamps, push mount ties and markers — meet all applicable Military Specifications.

PUSH MOUNT TIES

Cat. No. & Cross-section	Bundle Dia. Min./Max.	Approx. Length
PLP1.5I Intermediate Push Mount Tie	1/16"-1¼"	6⅛"
PLP2S Standard Push Mount Tie	1/16"-1¾"	7⅞"

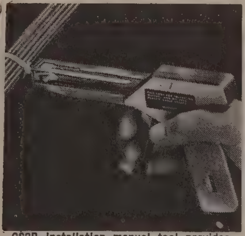
PANDUIT®

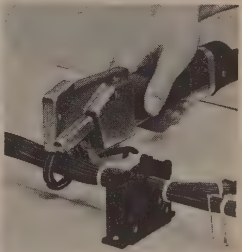
CABLE TIE INSTALLATION TOOLS

A complete tooling program to meet all production requirements for fast, neat harnessing.



GS2B Installation manual tool provides uniform tensioning and cutoff of all PANDUIT® miniature, intermediate and standard cross-section cable ties, clamps and markers; meets MIL-T-81306(AS), MS90387-1. Also available is GS4H manual installation tool for all standard and heavy ties; meets MIL-T-81306(AS), MS-90387-2.

PPTS hand-operated pneumatic cable tie installation tool. Installs all PANDUIT miniature, intermediate and standard cross-section cable ties, clamps and markers. Uses standard 70-80 psi air.



PATIM fully automatic cable tie installation tool. Automatically feeds cable tie around bundle, tensions the tie, and cuts off flush in less than 1 second. Weighs just 1¾ lbs. Accommodates bundles up to ¾" dia.

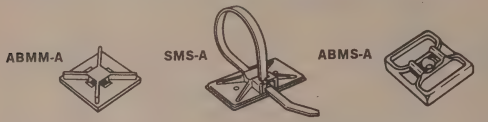
PANDUIT® wiring components

PANDUIT® MOUNTING & HARNESSING ACCESSORIES

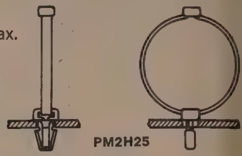
ADHESIVE BACKED MOUNTS

- Just peel backing paper off and apply to clean dry surface.

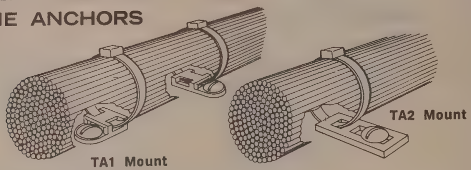


PUSH MOUNT

- For panel thickness ⅛″ max. Hole diam. nom. ¼″.



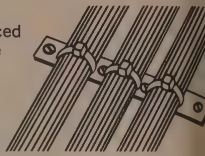
TIE ANCHORS



MULTIPLE TIE PLATES

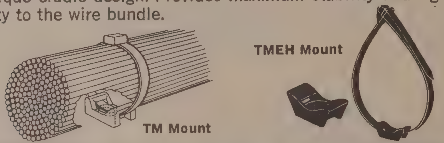
- Used for securing closely spaced parallel wire bundles. Available to hold from 1 to 6 bundles

MTP1S to MTP5S
MTP1H to MTP6H



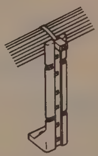
TIE MOUNTS

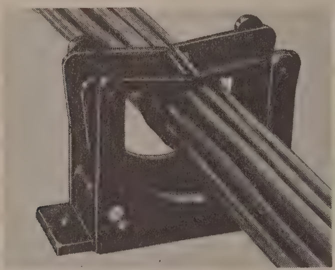
- Unique cradle design. Provides maximum stability and rigidity to the wire bundle.



PAN-POLE® Stand Off

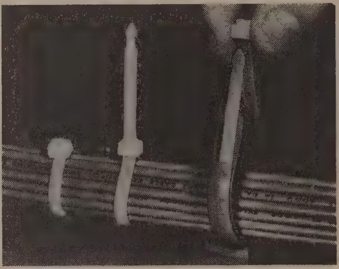
- Supports wire harness above and away from surface.





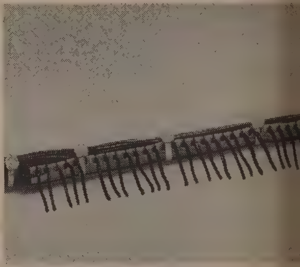
ELASTIC RETAINER (ER.5-E4 and ER1.25-E4)

- Unique, versatile, forms tight uniform harnesses. Two sizes.



PAN-RING® ACCESSORY (PR1 and PR2)

- Automatically threads PANDUIT® STA-STRAP® cable ties into head — speeds harness tying. Two sizes.



FANNING STRIP (FS156 and FSH40)

- Positive method (including strip holder) for assuring that wires are in sophisticated wiring harnesses.

PANDUCT®

PLASTIC WIRING DUCT

- Patented snap-in slot design provides complete accessibility, easiest method of inserting or removing wires, even with terminations attached.
- Unique rounded edge design of fingers protects wire insulation and personnel from cutting and abrasion.
- Non-slip cover prevents vibration slippage. Available for all width sizes.
- Recognized under the Components Program of Underwriters' Laboratories, Inc. Meets J.I.C. requirements. Approved by Canadian Standards Association.
- Standard color: light gray. Standard length: 6 ft.

PANDUIT® wiring components

PAN-TERM® TERMINALS, SPLICES, DISCONNECTS, WIRE JOINTS and INSTALLATION TOOLS

UL LISTED

Listed by Underwriters' Laboratories, Inc. and approved by Canadian Standards Association. PAN-TERM terminating devices have successfully passed the test requirements of U.L. specification 486 and CSA specification C22.2 No. 65 where indicated in Bulletin T-1 which lists the complete line.

Ring Tongue Terminals— Nylon and Vinyl Self-insulated

Wire range 22-18 and 16-14. Stud sizes 4 through ⅜.
Wire range 12-10. Stud sizes 6 through ⅜.
Expanded and extra-expanded insulation wire range 16-14. Stud sizes 4 through ⅜.
Expanded insulation wire range 12-10. Stud sizes 6 through ⅜.

Ring Tongue Terminals Non-insulated

Wire range 22-18 and 16-14. Stud sizes 4 through ⅜.
Wire range 12-10. Stud sizes 6 through ⅜.

Fork Tongue Terminals

NYLON SELF-INSULATED
Wire range 22-18 and 16-14. Stud sizes 6 through ¼.
Wire range 12-10. Stud sizes 6 through ¼.

VINYL SELF-INSULATED
Wire range 22-18 and 16-14. Stud sizes 6 through 10.
Wire range 12-10. Stud sizes 8 through ¼.
Expanded insulation wire ranges 22-18 and 16-14. Stud sizes 6 through 10.
Expanded insulation wire range 12-10. Stud sizes 8 through ¼.

Fork Tongue— Non-insulated

Wire range 22-18, 16-14 and 12-10.
Stud sizes 6 through ¼.

Flanged Fork Terminals Nylon Self-insulated

Wire range 22-18 and 16-14. Stud sizes 6 through 10.
Wire range 12-10. Stud sizes 8 and 10.

Flanged Fork Terminals Non-insulated

Wire range 22-18. Stud size 8.
Wire range 16-14. Stud sizes 6 and 8.
Wire range 12-10. Stud size 10.

Locking Fork Terminals Vinyl Self-insulated

Wire range 22-18 and 16-14. Stud sizes 6 through 10.
Wire range 12-10. Stud sizes 6 through ¼.
Expanded insulation wire range 22-18 and 16-14. Stud sizes 6 through 10.
Expanded insulation 12-10. Stud sizes 6 through ¼.

Locking Fork Terminals Non-insulated

Wire range 22-18 and 16-14. Stud sizes 6 through 10.
Wire range 12-10. Stud sizes 6 through ¼.

Female Disconnects

NYLON SELF-INSULATED
Wire range 16-14. Tab size .250 x .032, .187 x .020.
VINYL SELF-INSULATED
Wire range 22-18, 16-14 and 12-10*
*(.250 tab size only).
Tab size .250 x .032, .187 x .020, .110 x .020, and .110 x .032

Female Disconnects— Non-insulated

Wire range 22-18, 16-14 and 12-10*
*(.250 tab size only).
Tab size .250 x .032, .187 x .020, .110 x .020, and .110 x .032

Female Disconnects Fully Pre-insulated

FULLY VINYL INSULATED
Wire range 22-18 and 16-14.
Tab size .250 x .032 and .187 x .020.

Male Disconnects— Vinyl Self-insulated

Wire range 22-18 and 16-14. Tab size .145 x .032 and .250 x .032

Male Disconnects— Non-insulated

Wire range 22-18 and 20-14. Tab size .145 x .032 and .250 x .032

Butt Type Splices— Nylon Self-insulated

Wire range 22-18, 16-14 and 12-10.

Butt Type Splices— Vinyl Self-insulated

Wire range 22-18, 16-14 and 12-10.

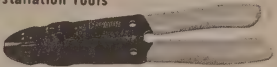
Butt Type Splices— Non-insulated

Wire range 22-18, 16-14 and 12-10.

One Piece Wire Joints— Nylon Self-insulated
Three types range from minimum of 2 #24 wires to a maximum of 4 #12 wires.

One Piece Wire Joints—Non-insulated
Three types ranging from minimum of 2 #14 wires to 4 #10 wires.

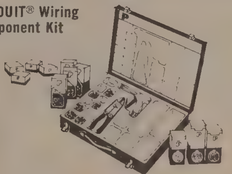
Installation Tools



CT-100 Tool crimps PAN-TERM insulated and non-insulated terminals, splices, disconnects and wire joints on wire ranging from #10 to #22. Also cuts and strips wire, and cuts popular screws.

CT-200 Tool installs non-insulated PAN-TERM terminals, disconnects and splices on wire ranging from #10 to #22.

PANDUIT® Wiring Component Kit



K-205 Combination Kit includes PAN-TY® cable ties, PAN-TERM® terminals and splices, cable tie installation tool and terminal application tool all in durable steel box with convenient compartments. Also available for maintenance and construction wiring are Cable Tie Kits and Terminal Kits.

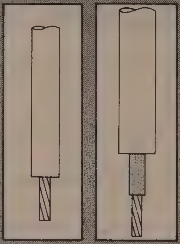
ROWE *Hi-V* Cable, Wire And Interconnections

Rowe Industries high-voltage cable, wire and interconnections are ideally suited for a variety of industrial and military applications including accelerators, radar, x-ray, ECM, etc. Hi-V is available in high-voltage single-conductor, coaxial and triaxial wire, and combines semi-conducting corona-suppressing layers with thermosetting materials to provide noise-free, corona-free cable and wire.

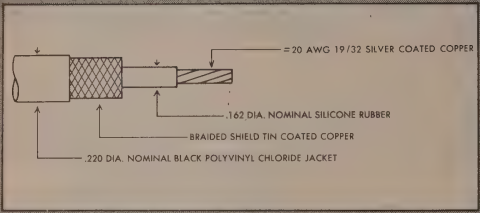
Single Conductor, Unshielded Types



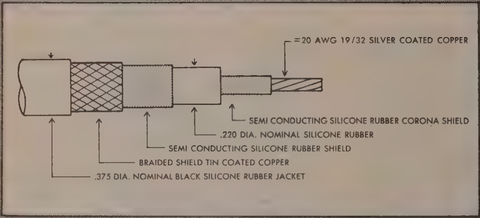
FEATURES:

- 5-60 KVDC minimum voltage ratings.
- 10-20 AWG corona-free, ozone-resistant material.
- 200°C operating temperatures.
- High flexibility at high & low temperatures.

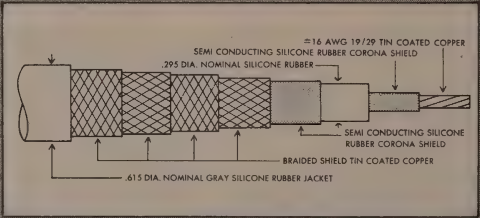
Coaxial Types



=20 AWG 19/32 SILVER COATED COPPER
.162 DIA. NOMINAL SILICONE RUBBER
BRAIDED SHIELD TIN COATED COPPER
.220 DIA. NOMINAL BLACK POLYVINYL CHLORIDE JACKET



=20 AWG 19/32 SILVER COATED COPPER
SEMI CONDUCTING SILICONE RUBBER CORONA SHIELD
.220 DIA. NOMINAL SILICONE RUBBER
SEMI CONDUCTING SILICONE RUBBER SHIELD
BRAIDED SHIELD TIN COATED COPPER
.375 DIA. NOMINAL BLACK SILICONE RUBBER JACKET

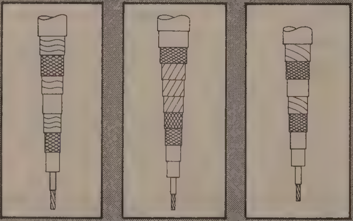


=16 AWG 19/29 TIN COATED COPPER
SEMI CONDUCTING SILICONE RUBBER CORONA SHIELD
.295 DIA. NOMINAL SILICONE RUBBER
SEMI CONDUCTING SILICONE RUBBER CORONA SHIELD
BRAIDED SHIELD TIN COATED COPPER
.615 DIA. NOMINAL GRAY SILICONE RUBBER JACKET

FEATURES:

- 5-100 KV minimum voltage ratings.
- 8-22 AWG corona-free & ozone resistant.
- 80°C to 200°C operating temperature.
- Excellent for high-pulse applications & for use with Rowe high-voltage miniature coaxial connector series, "G" series connectors, RFI-EMI applications, Rowe high-pulse connector series & Rowe R75 connector series. All types offer high flexibility.

Triaxial Types



FEATURES:

- 10-100 KV minimum voltage ratings, conductors to inner shield.
- 1-5 KV minimum voltage ratings, inner shield to outer shield.
- 50-100 PF/ft.
- 8-12 AWG
- 200°C operating temperature.
- Corona-free and ozone-resistant.
- High flexibility.
- For use with Rowe LL and RTX triaxial connector series. Excellent for high pulse applications. Several recommended for RFI-EMI applications.

ROWE
All-Temp
Silicone Rubber Wire and Cable

GIVE us a hellish environment — We love it!

Rowe's silicone rubber insulation gives better performance and endurance than natural rubber and thermoplastic insulation for maintaining circuit integrity while resisting damage from high heat, extreme cold, moisture and the effects of most oils, fuels, solvents and chemicals. It is also highly resistant to fungus and ozone.

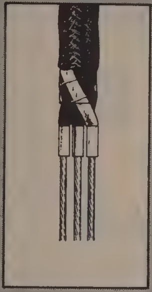
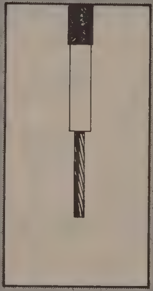
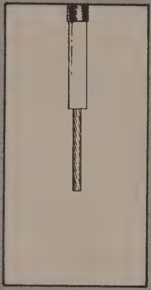
POWER CABLE
for 600 volts and up.



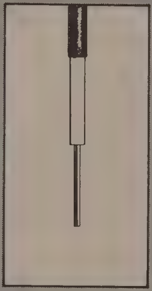
CONTROL CABLE
for 600 volts and up.



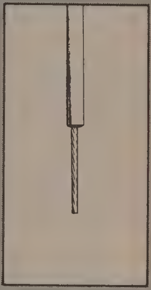
APPLIANCE & FIXTURE WIRE
for 300 volts and up.



APPARATUS & MOTOR LEAD WIRE
for 600 volts and up.



LIGHTING WIRE
for 600-volt transmission with solid tinned copper conductor, silicone rubber insulation and fiberglass braided covering.



NEW, All-Temp NB
especially suited for motor lead wire. No braided covering necessary. Tinned copper, stranded or solid tinned copper conductor. Silicone rubber insulation in ten colors. Ask for application information.

All the above wire and cable feature tinned copper, stranded conductors; silicone rubber insulation, with fiberglass braided covering.

AVAILABLE AS STANDARDS OR CUSTOM DESIGNED.

Fit these features...

Heat stability to 250° • Flexibility to —90°C • Unaffected by severe thermal cycling • Age-resistant • Unaffected by ultraviolet radiation • Resistant to moisture and chemicals • Highly flame retardant • Unaffected by ozone or corona • Tough enough for unbraided lead wires.

with these industries & applications

High heat locations such as furnaces, ovens, ranges • Aircraft, spacecraft, ships, locomotives, polar equipment • Refrigerators, freezers, washers, dryers, cars, trucks • Power tools, radio, television sets, transformers • Power plants, pulverizing mills, foundries, cement plants • Kilns, soaking pits, ceramic ovens • Rolling mills, arc furnaces, steel mills, glass manufacturing • Computers, office equipment • Sanitary, food equipment.

DESIGN ● DEVELOPMENT ● MANUFACTURING

Specialized Wire and Cable

Since 1947, Rowe Industries has been noted for quality and reliability in high-voltage, corona-free connectors and cable assemblies.

Rowe's expertise has always included the incorporation of wire and cable in cable assemblies, including long experience in molding neoprene, butyl and silicone rubber and using braids of aluminum, copper, fiberglass, dacron and many other materials.

TEST FACILITIES FOR

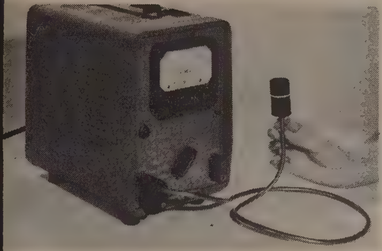
complete shielding accessories & mica

MAGNETIC SHIELD DIVISION

Perfection Mica Company
740 Thomas Drive
Bensenville, Illinois 60106
(312) 766-7800 TWX (910) 256-4815

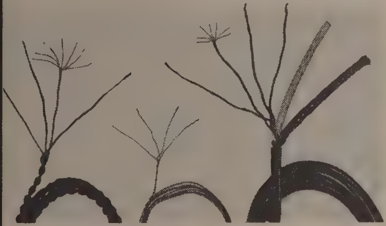


LAB KITS & PROBES

Perfection Mica's recently introduced e.m.i. shielding lab kit contains Netic and Co-Netic shielding material, double-side adhesive tape for shield construction and an LK-101 A.C. magnetic pick-up probe (output 20 millivolts/gauss @ 60Hz) . . . all for only $99.50. Higher sensitivity probes of 60 millivolts/gauss are available on individual order.

COMPONENT SHIELDS

Perfection Mica stocks many standard shield enclosures for relays, reed switches, transformers, CRT's, small motor assemblies, etc. High attenuation shields can also be quickly fabricated for special component or sub-assembly configurations. Call Perfection Mica for a fast estimate on any of your shielding needs.

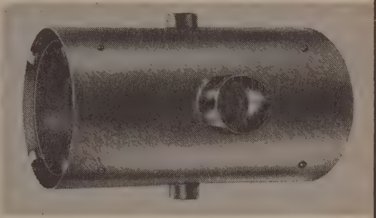


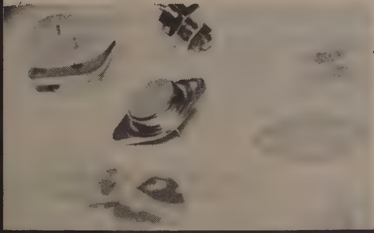
INTER-8 WEAVE CABLE

The special twisted configuration of individual wire leads within Inter-8 Weave Cable provides lower pick-up or radiation between interconnections. Typical performance improvement is −20 db for radiation and −12 db for pick-up. Plain or Co-Netic shielded cables are available in wire size 24 AWG in lengths up to 500 feet.

ZERO GAUSS CHAMBERS

Zero gauss chambers provide the ultimate in magnetic shielding. Perfection Mica's general-purpose zero gauss chamber (ZG-102), offers a significant reduction in both static and time varying fields normally found in laboratory and research environments. A Helmholtz coil system can be incorporated so that known fields can be generated for calibration purposes. Three concentrically spaced Co-Netic chambers with closed ends and two removable covers with openings for cable egress are provided.

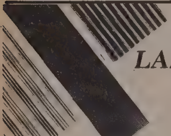




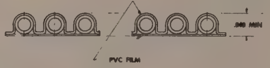
MICA INSULATORS

All types of mica available. Supplied in clear, natural, and built-up sheet stock in thicknesses ranging from .001″ to .062″. Save tooling expense on many varieties of fabricated parts including semi-conductor insulators in .001″ to .003″ thickness with .002″ hole tolerances. Excellent heat dissipation and high dielectric strength improves breakdown protection and efficiency of semi-conductors.

SPECTRA-STRIP COMPLETE RIBBON CABLE INTERCONNECTION SYSTEMS



SPECTRA-STRIP 3C™ LAMINATED RIBBON CABLE

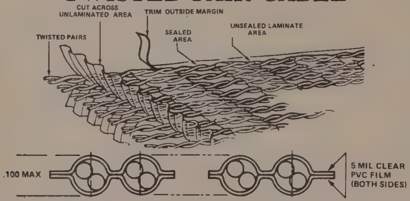


The design flexibility of Laminated 3C (Controlled Characteristics Cable) provides precise spacing of conductors to control such critical parameters as impedance, capacitance, crosstalk and attenuation. Standard with uniform .050" conductor spacing, compatible with standard Insulation Displacement Connectors, (IDCs), 3C cable can also be ordered with other controlled conductor spacing. Round conductors are available from 6 to 32 AWG, insulated or uninsulated. Also available are flat conductors and a variety of standard UL recognized styles.

STANDARD CONFIGURATION

Standard 3C cables are available in 28 AWG 7-strand conductor, with 10 to 60 conductors per cable, laminated between sheets of .005" PVC film. Standard color codes are Br-R-O-Y-Gr-Bl-Vi-Gy-Wh-Blk, repeat; or all gray with one edge red. PVC insulation meets MIL-W-16878D Type B, listed by UL. Special configurations, intermixed sizes, choice of conductor sizes from 6 to 36 AWG, spacing, color coding and insulation are readily available. Up to 100 conductors may be ordered in a single cable. Single-side shielding or ground plane shields are also available to meet specific crosstalk and impedance requirements.

3C™ INTERMITTENT LAMINATE TWISTED PAIR CABLE



Intermittent lamination on 3C Twisted Pair cable permits quick laminate peel-back, untwisting of insulated conductor pairs, and preparation for termination. Unbonded twisted pairs are positioned side by side on controlled centers and laminated between .005" sheets of PVC film at approximately ¾-inch intervals along the length of the cable. Cutting across an unlaminated area provides access to free conductor pairs, easy to separate and terminate.

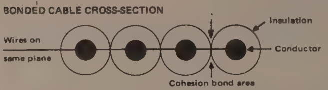
Intermittent Laminate Twisted Pair cable may be ordered in any color code (with one conductor of each pair either white or black), in uniform or mixed sizes from 22 to 30 AWG, with any standard laminate film, and with any number of twisted pairs up to a maximum cable width of 6 inches.

DOUBLE-TWIST™ LAMINATED TWISTED PAIR CABLE

Easier to separate and terminate than bonded twisted pair cable, Spectra-Strip Double-Twist cable incorporates individually-insulated conductors twisted together in pairs, but not bonded to one another. The cable is comprised of a series of two twisted pairs placed side by side, and laminated together intermittently in a "pocket" of PVC film. Grooves or "nip areas" can be incorporated between sets of two twisted pairs, permitting a set to be separated from the main cable without removing lamination from the entire cable. Grooves can be placed anywhere in the cable, after any even-numbered pair.

Double-Twist cable can be ordered with any number of pairs (in multiples of two pairs), in conductor sizes from 22-30 AWG. Conductor sizes can be uniform or mixed. Standard insulation is .005" PVC, with other laminates and thicknesses available. Any color code can be ordered, with one conductor in each pair black or white.

SPECTRA-STRIP® BONDED RIBBON CABLE



Spectra-Strip Bonded flat ribbon cable is compatible with all standard terminating techniques. Constructed of stranded or solid round conductors insulated with PVC and bonded together in a flat plane, bonded cable saves space and reduces costs. Consistent wire geometry assures repeatable and reproducible electrical characteristics, while the bonded cable's flexibility and configuration permit it to conform to package contour. UL-listed styles are available.

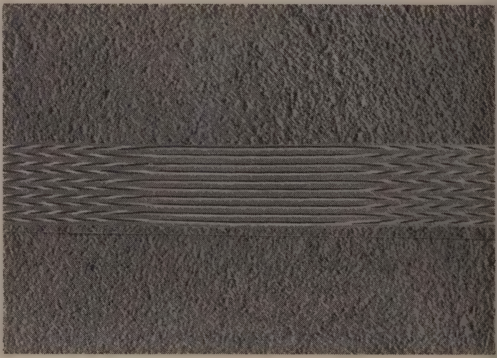
STANDARD CONFIGURATION

Standard bonded cables range from 10 to 30 conductors, 22 to 30 AWG, in 7- or, 19-strand wire. Standard color code is Br-R-O-Y-Gr-Bl-Vi-Gy-Wh-Blk, repeat. Special configurations with solid conductors (26-30 AWG), 2 to 100 conductors, variety of color coding and intermixed conductor sizes may be ordered.

SPECTRA-TWIST® CABLE

Spectra-Twist Bonded twisted pair cable controls crosstalk at less cost than shielding, and is especially useful in communications and data processing applications. Individually insulated round conductors are twisted in pairs and bonded together in a single plane to form a flexible, flat ribbon cable. Spectra-Twist incorporates all the advantages of single-conductor bonded cable: compatibility with standard terminating techniques, consistent, repeatable electrical characteristics, narrowness of width, and conformation to package contour.

NEW! TWIST 'N' FLAT™ LAMINATED TWISTED PAIR CABLE



New Spectra-Strip Twist 'n' Flat™ twisted pair cable provides for multiple conductor termination by alternating lengths of twisted pairs positioned on controlled centers, with areas of untwisted parallel conductors. Termination of one, several, or all twisted pairs in the cable may be made at any of the parallel-conductor areas.

Standard configuration provides 10 twisted pairs of 28 AWG stranded wire, alternately twisted for 18" and separated as parallel conductors for 3". For special applications, any color coding, conductor sizes or standard laminates are available. Any number of twisted pairs may be ordered, up to a maximum of 26 pairs, and lengths of twisted and parallel areas may be varied to customer requirement.

ONLY FROM SPECTRA-STRIP: CUSTOM FLAT RIBBON CABLES AND SYSTEMS

Only Spectra-Strip makes "specials" a standard product line. Many applications ideally require unusual cable configurations, special limitations, mixed conductor sizes (even combinations of single conductors and twisted pairs in a single cable), shields or ground planes, specific color codes or other special considerations not usually met by off-the-shelf standards.

Special requirements are our specialty—give us all available information on your application, and our engineers will devise a ribbon cable solution to your interconnection problem and your budget. Don't settle for what's available; select what you **really** need from Spectra-Strip.

SPECTRA-STRIP

7100 Lampson Avenue, Garden Grove, California 92642 / Tel.: (714) 892-3361 TWX: (910) 596-1314

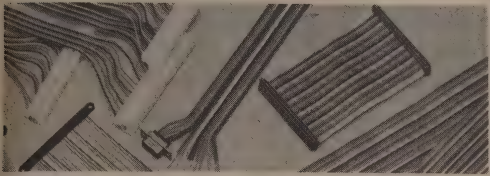
COMPLETE RIBBON CABLE INTERCONNECTION SYSTEMS **SPECTRA-STRIP**

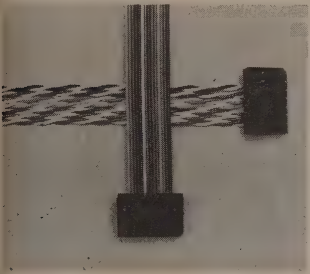
SPECTRA-STRIP CUSTOM CABLE ASSEMBLIES AND HARNESSES



Interconnections have become a critical component in today's sophisticated electronic systems, rather than an unwelcome afterthought. Spectra-Strip's complete selection of flat ribbon cables and components, and our established interconnection design experience enables us to design and produce your complete system or subsystem, ready for installation. Spectra-Strip's manufacturing facilities conserve yours, saving you both time and labor costs on production quantities.

Call on Spectra-Strip for your total interconnection needs. We'll do the job from start to finish, or any portion thereof.

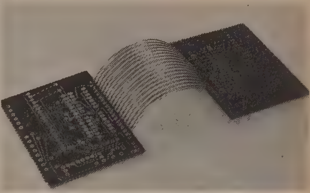
IC INTERCONNECT ASSEMBLIES



Pre-assembled flat ribbon cable IC interconnections from Spectra-Strip provide a fast, efficient and inexpensive solution to complicated bussing and crossovers between PC boards, backplanes and other IC circuitry. Standard with 26 AWG 7-strand wire and 14- or 16-pin Dual-Inline plugs at one or both ends, Spectra-Strip's IC interconnect assemblies are available in other sizes and terminations to suit your specific requirements.

SPECTRA-STRIP JUMPER ASSEMBLIES

Low-cost, labor-saving Spectra-Strip Jumper Assemblies eliminate connectors by providing precise, controlled conductor positioning, with pre-tinned wire leads ready to solder directly to PC boards. Supplied in specified lengths or continuous rolls, pre-stripped at intervals, S-S jumper assemblies are made to your specification from solid or stranded conductors in sizes 22-30 AWG. Specify desired conductor size, pitch, number of conductors, insulation, color coding, assembly length and strip length. Standards are in stock, ready for installation.



FLAT RIBBON CABLE CONNECTORS

Flat ribbon cable users need flat ribbon cable connectors, and Spectra-Strip has a complete selection—Insulation Displacement (IDC) types; straight, right-angle and protected-pin Headers; DIP sockets and plugs for IC connections—whatever your application requires. Complete your flat ribbon cable needs with Spectra-Strip's wide selection of components.

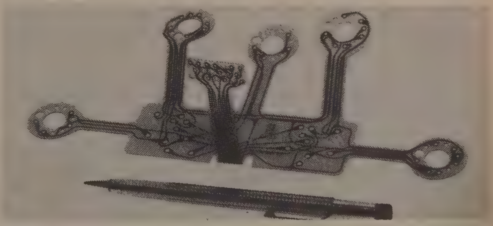
SPECTRA-STRIP HOOK-UP WIRE

All hook-up wire is **not** alike, and Spectra-Strip makes its own wire specifically to insure controlled, consistent quality, concentricity of conductor and insulation, longer flex life, strength and ruggedness for its own cable products. Now the best hook-up wire on the market is available to you at competitive prices, in all standard AWG sizes, ten colors for coding with special colors and stripes available, solid or stranded conductors. Also available is a wide variety of CSA classes and UL recognized styles. Call on Spectra-Strip for better-than-average delivery on **much** better-than-average hook-up wire.

SPECTRA-FLEX™ FLEXIBLE CIRCUITS

Today's electronic designers are rapidly discovering an efficient means of saving space, reducing weight and volume, eliminating expensive connectors, and saving labor costs on assembly, inspection and testing with Spectra-Flex flexible circuits. In some applications, conversion from conventional rigid PC boards to Spectra-Flex circuits has saved as much as 50% in labor costs, 60% in weight and 80% in volume. An entire flexible circuit system becomes a single component, which can be folded up and installed in any available space in your equipment package.

For a total concept in flexible printed circuits, Continental Circuits Corp., a subsidiary of Spectra-Strip, offers a complete service: design analysis, engineering, prototype preparation, drafting and design, material specification, environmental testing, and continuous-process production. Order any quantity, from prototypes to mass production. Contact us for complete details.



CONTINENTAL CIRCUITS CORP. subsidiary of **SPECTRA-STRIP**

STANDARD WIRE & CABLE CO.

A COMPLETE SOURCE FOR ELECTRICAL WIRE, CABLE & CORD

Branch offices and warehouses, Coast to Coast, enables us to give you FAST DELIVERY of over 25,000 Wire & Cable litems.

SWC experts can solve your specific Wire & Cable problems. We custom design, engineer and develop to provide the most practical solutions for your wire applications.

Depicted are several condensed pages of the most complete Wire & Cable catalog in the industry. Send for your free copy.

INSTRUMENTATION CONTROL CABLE

CABLES MADE TO ORDER 600 VOLT 105° C

APPLICATIONS: interconnecting cables for electronic equipment, telemetering, instrumentation, control, computers.

CONDUCTORS: stranded, tinned copper per Type "B" to MIL-W-16878D
24 AWG — 7/32 20 AWG — 7/28
22 AWG — 7/30 18 AWG — 7/26

INSULATION: .010 nominal wall semi-rigid 105°C to minus 55°C Vinyl per Type "B" to MIL-W-16878D. 600 volts.

CODED: NUMBERED consecutively in black on white insulation at approximately 1 inch intervals.

CABLED: round with fillers where needed

JACKET: black flexible Vinyl, 105°C to minus 40°C

ENGINEERING CHARACTERISTICS:
Temperature rating 150°C to minus 40°C. Resistant to flame, moisture and many oils and chemicals.

Approximate capacitance between adjacent conductors in pico farads per foot:
24 AWG: 32
22 AWG: 35
20 AWG: 38
18 AWG: 41

INSTRUMENTATION CONTROL CABLE WITH OVERALL SHIELD 600 VOLT 105° C

APPLICATIONS: interconnecting cables for electronic equipment, telemetering, instrumentation, control, computers.

CONDUCTORS: stranded, tinned copper per type "B" to MIL-W-16878D
24 AWG—7/32 22 AWG—7/30 20 AWG—7/28 18 AWG—7/26

INSULATION: .010 nominal wall semi-rigid 105°C to minus 55°C Vinyl per Type "B" to MIL-W-16878D. 600 volts.

CODED: NUMBERED consecutively in black on white insulation at approximately 1 inch intervals.

CABLED: with fillers where needed for roundness.

OVERALL SHIELD: braided tinned copper, 80% coverage.

JACKET: black flexible Vinyl, 105°C to minus 40°C.

ENGINEERING CHARACTERISTICS:
Temperature rating 105°C to minus 40°C. Resistant to flame, moisture and many oils and chemicals.

Approximate capacitance between adjacent conductors in pico farads per foot:
24 AWG: 32 22 AWG: 35 20 AWG: 38 18 AWG: 41

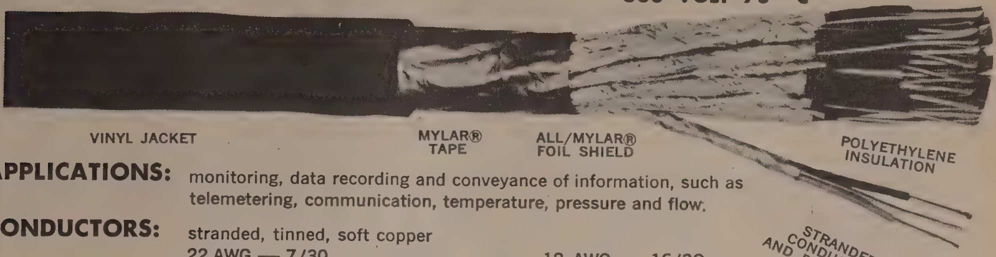
MULTIPLE PAIR CONTROL CABLE, EACH PAIR SHIELDED

300 VOLT 75° C



APPLICATIONS: monitoring, data recording and conveyance of information, such as telemetering, communication, temperature, pressure and flow.

CONDUCTORS: stranded, tinned, soft copper
22 AWG — 7/30
20 AWG — 7/.0121
18 AWG — 16/30
16 AWG — 26/30

INSULATION: high dielectric strength, low loss polyethylene
22 AWG — .015 nominal wall
20 AWG — .015 nominal wall
18 AWG — .020 nominal wall
16 AWG — .020 nominal wall

PAIRS: are formed by twisting 2 conductors with an uninsulated stranded tinned copper drain wire (for terminating shield). 22 AWG and 20 AWG pairs utilize a 22 AWG drain wire; 18 AWG and 16 AWG pairs a 20 AWG drain wire.

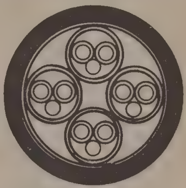
PAIR SHIELDS: each pair is shielded with Mylar® supported Aluminum Foil, spirally wrapped. The aluminum foil is .00035 inch thick and the Mylar® supporting film is .0005 inch thick.

CABLED: round with fillers where needed

BINDER: .001 inch thick Mylar® tape

®DuPont Trademark

JACKET: black flexible Vinyl, 80°C to minus 40°C



CROSS SECTION OF CABLE

ENGINEERING CHARACTERISTICS:

Temperature rating 75°C to minus 40°C. Resistant to flame, moisture and many oils and chemicals. **Approximate capacitance** in pico farads per foot:

	Mutual	Between one cond. and other cond. tied to shield
22 AWG Pair	25	48
20 AWG Pair	30	56
18 AWG Pair	28	53
16 AWG Pair	35	67

shigoto cables and cord sets

...we go to any lengths ...we go to any ends.

That's why Shigoto can help make your ends meet. From hundreds of standard combinations to unusual characteristics that meet your own requirements. Even U.L. and C.S.A. approved. Our volume production for O.E.M.'s in electronics, communications, automotive, appliances, and practically every other industry, takes all the variables out of price-performance differences. Shigoto's ability to consistently produce top quality assemblies, when combined with large quantities, always brings in the prices you need. Unmatched quality has become our standard, our reliability and delivery schedules will become yours. Call, write, or wire your specs. At Shigoto, you'll find we'll go to any ends, to any lengths, to satisfy you.

Shigoto Industries Ltd.

350 Fifth Avenue, New York, N.Y. 10001/ (212) 695-0200/ Telex 224219

One of the World's Largest Manufacturing Importers

TRW® HOLYOKE WIRE & CABLE

TOTAL CAPABILITY IN PRECISION CABLE ASSEMBLIES

At TRW/Holyoke Wire and Cable, "total capability" in the manufacture of precision cable assemblies and harnesses is a blend of complete facilities, advanced technology, and wide experience.

Every manufacturing step — from the drawing of individual copper wires to the attaching of hardware and molding of the connector — is performed internally to achieve maximum cost effectiveness and control of product quality.

Through its complete in-house wire and cable manufacturing facilities, TRW/Holyoke is equipped to fabricate any cable assembly or harness, regardless of its complexity.

Laced or textile braided assemblies, with shielded breakouts and solder or crimp attachment of any single or multiple termination can be supplied. Dies for molded connector assemblies are designed and built internally for a wide range of molding materials.

DRAWING — Copper wire is drawn to a specific diameter on seven machines, each with an average production rate of 6,000 ft./min. Wires as small as 36 AWG (.005″) can be produced.

TINNING — Three tinning lines deposit 40 microinches of tin on the copper wire as it moves through the tinning baths. Each spool picks up wire at a rate of about 300 ft./min. or almost 3 million feet per 8 hour shift.

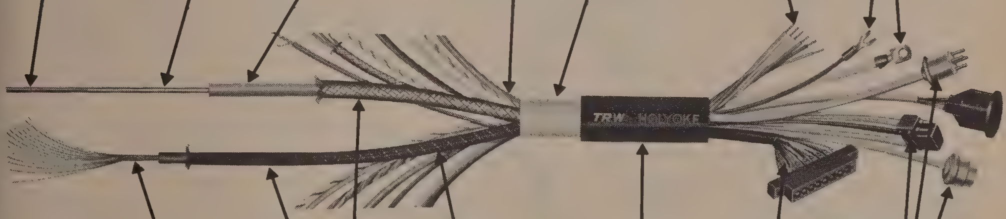
EXTRUDING — By changing the extruding die, insulated wire with insulation thicknesses up to 0.155″ can be produced. The 12 extruding machines at TRW/Holyoke have a combined capacity in excess of 7,000,000 ft. per day.

CABLING — The cabling department has an average capacity of 100,000 ft. of cable per day. This varies greatly with the complexity of the cable. There are additional machines for production of twisted pairs.

WRAPPING — When required, special equipment like this is available for wrapping the cable with mylar shielding or textile binding. Usually, these operations are carried out as part of the cabling process.

CUTTING/STRIPPING — There are numerous machines, capable of preparing lengths of wire from 2 inches to 40 ft. including several which automatically attach terminals as part of the process.

CRIMPING — The assembly department has scores of crimping machines capable of handling the terminals of all major manufacturers. Critical parameters are held to a high degree of precision.



STRANDING — Depending upon the length of the twist or "lay" as well as the diameter of the wire, these 36 machines each produce stranded wire at a rate of 50-100 ft./min., utilizing the total output of the tinning lines.

BRAIDING — The braiding room contains over 400 machines, including "butt" braiders which produce "breakout" textile cables of the type shown on cable assembly page. Capacity is in excess of 2,000,000 ft. per day.

LACQUERING — This department can easily match the total capacity of the braiding room. A number of lacquer and saturant formulations are used to impart anti-fray, flame-retardant, moisture and fungus resistant properties.

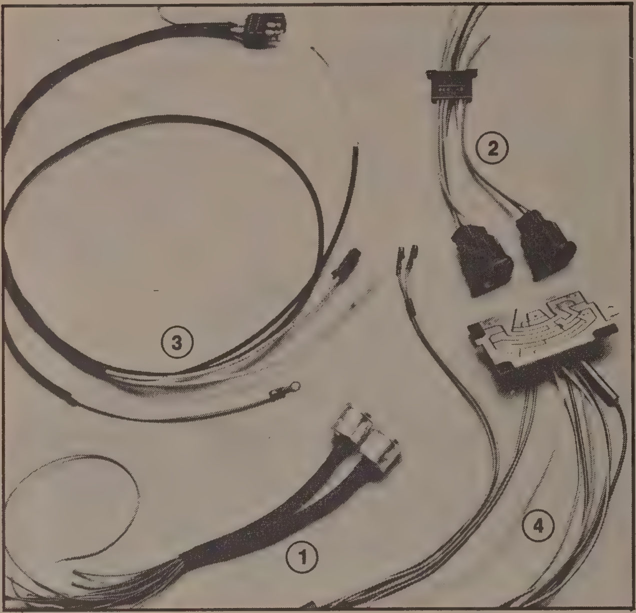
JACKETING — Jacketing of cables is accomplished on the extruding machines with the use of appropriately designed extruding dies and adjustment of temperatures, cooling profile, line speed, etc.

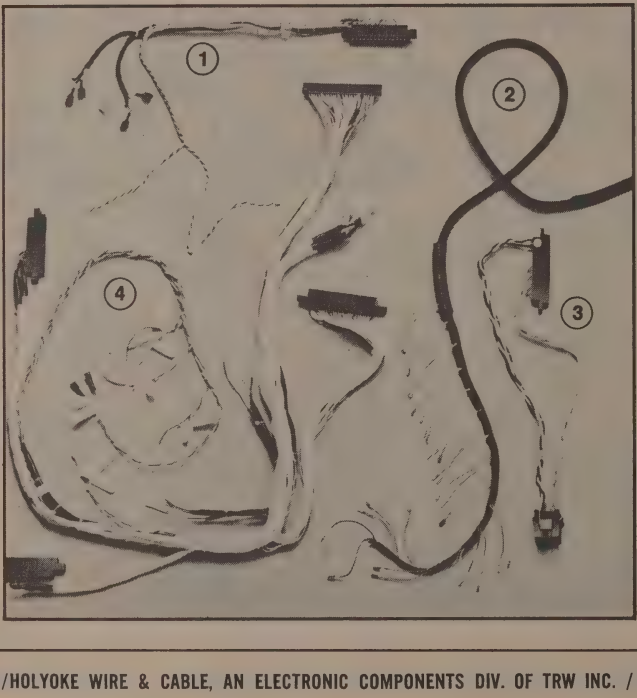
SOLDERING — Over 4,000 sq. ft., with numerous production lines is devoted to soldering in the assembly area. Internally designed jigs and tools are used to obtain maximum production rates.

MOLDING — Fifteen automatic machines, whose output varies with the size and complexity of the part are now in operation. Electrical testing is conducted at the machine as the part is completed.

TRW/HOLYOKE WIRE & CABLE, AN ELECTRONIC COMPONENTS DIV. OF TRW INC. / 720 MAIN STREET / HOLYOKE, MASS. 01040

TRW® HOLYOKE WIRE & CABLE





CABLE ASSEMBLIES

Automotive cable assemblies produced by TRW/Holyoke cover the range from low voltage, low current semiconductor circuit devices to high power, high reliability types — all with the appropriate environmental terminations and connectors.

1. Passenger car rear seat control cable assembly incorporating Y-shaped "break-put" nylon braiding to two solder-terminated female connectors.

2. Dual connector electronic ignition cable assembly with molded grommet and molded-in blade contacts in pull-apart insulator shells.

3. Semi-trailer refrigeration system nylon braided cable assembly, for high reliability control application. Coded aircraft type connectors, terminated with pre-insulated crimped terminals and molded automotive type plug.

4. Automobile climate control cable assembly with crimp insertable contacts in male plugs and crimp contacts riveted to a printed circuit board switch panel.

TRW/Holyoke's most complex assemblies are those supplied to the computer industry. The combining of many type of conductors, terminals and connectors in a single harness is not uncommon. TRW/Holyoke can incorporate special PC boards or connectors provided by the customer, or will purchase these for the customer, in addition to producing any special molding dies that may be required.

Complete testing facilities are available — no matter how complex the harness assembly.

1. Thirty conductor cable assembly with four molded tapehead connectors, 50 position edge connector and miscellaneous wire terminations.

2. Thirty-two conductor cable using unique braiding technique that allows shielding the entire length of each breakout section. Continuous nylon braid to end of breakout combines minimum cable diameter with high flexibility.

3. Fifteen crimp-insertable terminations (4 twisted pairs, 7 single) in nylon plug and PC connector assembly.

4. Sixty-six conductor harness assembly with four crimp insertable terminal edge connectors, crimp plug and miscellaneous terminals.

TRW/HOLYOKE WIRE & CABLE, AN ELECTRONIC COMPONENTS DIV. OF TRW INC. / 720 MAIN STREET / HOLYOKE, MASS. 01040

TRW® HOLYOKE WIRE & CABLE

WIRE & CABLE

The manufacture of single-insulated conductors is a highly technical process that requires precision control of a variety of production parameters, including temperature, wire diameter, die size, and production rate.

Establishment of these parameters is the result of an intimate knowledge of equipment capabilities and material characteristics. At TRW/Holyoke this knowledge is based on over sixty years of experience.

Critical requirements, such as low cross talk levels in telecommunication and EDP cables, minimum impedance discontinuities in RF cables, and enhanced flame retardancy in home entertainment wires and wiring devices, are regularly engineered into products. The requirements of Underwriters' Laboratories fulfilled through design engineering.

Any combination of single wires, twisted pairs, and coaxial cable, in any number, with necessary fillers and bindings can be incorporated into a cable. The only limitation is that the cable diameter not exceed 1.75″; flat braided (woven) cable, up to 0.5″ width. Flat rainbow (ribbon) cable is available with 2 to 43 parallel conductors.

Manufacturing Options

Conductors

Copper, copper covered steel, cadmium bronze, phosphor bronze, precious metal alloys.

10 through 30 AWG

Solid or Stranded or Tinsel

Stranding from 7 to 500 strands

Bare or Tinned

Topcoat, Overcoat, Heavy Tinned — fused

Insulations

Polyethylene

Kynar***

Polypropylene

Polyurethane

Polyvinyl Chloride (PVC)

Silicone Rubber

FEP Teflon**

Nylon

Tefzel**

Insulation wall thickness from .002″ to .155″

Textile Braids

Celanese*

Cotton

Dacron**

Glass

Nylon

Orlon**

Rayon

. . . with or without lacquer

Shieldings

Conductive Vinyl

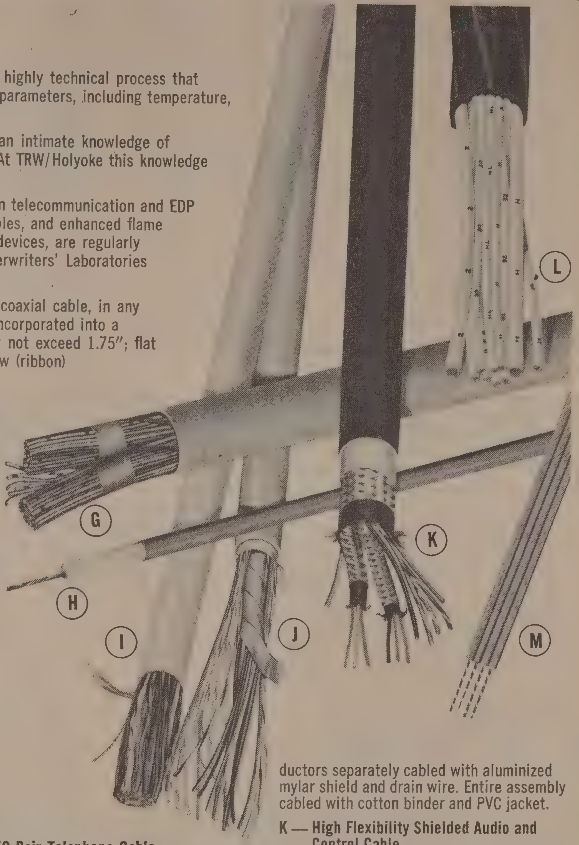
Aluminized Mylar**

Spiral Wrapped and Braided Copper

***Pennwalt Corp. T.M.

**DuPont T.M.

*Celanese Corp. T.M.



G — 52 Pair Telephone Cable

Semi-rigid thin wall insulated #24AWG solid conductors with band marked color coding. Conductors paired with programmed lay for minimum cross-talk. Assembled into 25 pair units with coding binders and four spare conductors, with flexible PVC sheath overall. Overall diameter .625″. Rated at 80°C.

H — High Voltage Lead Wire

Tinned copper conductors, solid or stranded, covered with flame retardant high dielectric strength insulation with 105°C. PVC jacket. Construction is designated as UL style #3239 and can be provided in a variety of conductors and voltage ratings to 40 KV.

I — Telephone Distribution Cable

25 pairs #24AWG solid conductors with thin wall semi-rigid insulation, spiral stripe coded. Pairs cabled with flexible bunch lay. PVC sheath extruded overall with nylon rip-cord under sheath. O.C. is 0.375″.

J — Mini Computer Memory Bank Cable

36 conductors with flexible stranding, PVC insulation and spiral stripe coding. 12 conductors separately cabled with aluminized mylar shield and drain wire. Entire assembly cabled with cotton binder and PVC jacket.

K — High Flexibility Shielded Audio and Control Cable

Cable core of seven #24AWG PVC insulated single conductors and two triple conductor cables of #24AWG stranded conductors PVC insulated with color coded textile braiding. These three conductors are then nylon braided as a unit and copper-braid shielded. The entire cable core is nylon braided and copper shielded with a PVC jacket overall.

L — Power and Control Cable

Nine #18AWG and two #12AWG stranded conductors insulated with 105°C. thermoplastic, then covered with lacquered glass braid and extruded nylon. Cabled with extruded thermoplastic jacket overall. Rated 600 volts, −55°C to +105°C. For on-the-road tractor-trailer interconnection.

M — Environmental Resistant Flat Cable

Four stranded conductors simultaneously insulated with high performance extruded silicone rubber compound to form an extremely flexible high reliability cable for military applications. Rated at 300V., −100°C. to +200°C., moisture, fungus and radiation resistant.

TRW/HOLYOKE WIRE & CABLE, AN ELECTRONIC COMPONENTS DIV. OF TRW INC. / 720 MAIN STREET / HOLYOKE, MASS. 01040

MICRO-COAX *The RELIABLE Semi-*

Micro-Coax semi-rigid coaxial cable transmits and/or receives a high-speed, high-frequency microwave signal. It is the most dependable, predictable way of achieving:

- low loss, total shielding at or near theoretical value
- elimination of radiation leakage
- lowest possible attenuation
- unequalled VSWR performance through 18 GHz
- miniaturization of power componentry

Micro-Coax semi-rigid coaxial cable offers these outstanding performance characteristics:

Attenuation: The solid center conductor of a Micro-Coax Cable provides the optimum geometric surface for transmission. • Impedance Matching: Low VSWR. The dielectric is controlled to exacting tolerances to minimize reflected power loss. • Shielding: Isolation is greater than 130 dB. There is virtually no extraneous signal pick-up. • Packaging: Metallic tubular outer conductor offers minimum size and maximum conductor integrity. Copper jackets can be soldered directly to circuit boards. • Workability: Micro-Coax is easily bent, coiled, stripped, machined, soldered, or connected without impairing performance. Ends can be quickly and dependably prepared.

STANDARD GENERAL PURPOSE 50 OHM MICRO-COAX CABLES

Standard 50 ohm Micro-Coax Cables feature low VSWR and low attenuation covering the entire microwave spectrum. They have good power handling ability and excellent interface dimensions for SMA, SMB, and Type N and TNC connectors.

CABLE PROPERTIES: Copper outer conductors • Teflon® PTFE dielectrics • Wide variety of outer conductor diameters • Capacitance 29.0 pF/ft • Velocity of propagation 70%

TYPICAL APPLICATIONS: Microwave transmission lines • Amplifier shielding or isolation • Totally shielded interconnections • Microwave delay lines

ULTRAMINIATURE 50 OHM MICRO-COAX CABLES

Ultraminiature 50 ohm Micro-Coax Cables provide maximum impact of signal clarity. They meet the demands of package density, optimum VSWR and attenuation as a function of size. They feature total shielding for the elimination of signal loss and noise, and are ideal for low power, high reliability applications.

CABLE PROPERTIES: Copper outer conductor • Teflon® PTFE or FEP dielectrics • Capacitance 29.0 pF/ft • Ultraminiature sizes • Velocity of propagation 70%

TYPICAL APPLICATIONS: High reliability miniature packages • Miniature delay lines • Printed circuit wiring • High-speed computers

AIR ARTICULATED (SPLINE) 50 OHM MICRO-COAX CABLES

Air articulated cables provide excellent impedance matching, low weight, low loss transmission lines. Although special care must be taken in bending and installation of these cables, they provide properties not found in solid dielectric cables.

CABLE PROPERTIES: Low attenuation • Low weight • Copper or aluminum outer conductors • Tubular copper center conductors • Teflon® PTFE spline dielectrics

TYPICAL APPLICATIONS: Space craft interconnections • Antenna feed cables • Liquid level sensing devices • Low loss receivers

Rigid Coaxial Cable MICRO-COAX®

50 OHM MICRO-COAX CABLES WITH SPECIAL OUTER CONDUCTORS

Aluminum or stainless steel outer conductor materials are used in 50 ohm Micro-Coax Cables to optimize such properties as resistance to corrosion, the ability to withstand temperature extremes, and weight.

CABLE PROPERTIES: Solid Teflon® PTFE or FEP dielectrics • Capacitance 29.0 pF/ft • Velocity of propagation 70% • Resistance to corrosion • Resistance to temperature extremes • Resistance to short-term nuclear atmospheres • Light weight

TYPICAL APPLICATIONS: Any circuitry environment from undersea to outer space in which unusual temperatures are encountered, or in which weight is an important factor

10, 15, 25, 70, 75, 93 and 95 OHM MICRO-COAX CABLES

Copper-jacketed Micro-Coax Cables designed to meet close tolerances in both impedance and capacitance. Sizes range from 0.034 inch through 0.250 inch outside diameters. Total shielding eliminates undersized coupling while copper jacket facilities direct soldering.

CABLE PROPERTIES: Copper outer conductors • Teflon® PTFE dielectric • Velocity of propagation 70% • Total shielding

TYPICAL APPLICATIONS: CATV amplifier wiring • Capacitor sections • Low impedance matching for solid state units • Quarter-wave transformer sections

MICRO-COAX CABLE ASSEMBLIES

The usefulness of Micro-Coax semi-rigid coaxial cable is increased by its ability to be formed or fabricated into simple or complex geometric assemblies. Coiling, bending, stripping, and soldering, attaching connectors and other secondary operations result in delivery of maximum power in minimum space. The fabrication potential of Micro-Coax Cable is practically limitless, meeting mechanical and environmental requirements in phase matching, attenuation and VSWR optimization, assembly, encapsulating and insulating, and delay calibration. UTI provides finished assemblies, pretested and ready for installation.

CONDUCTOR MATERIALS

OUTER CONDUCTOR: Copper, beryllium copper, stainless steel, stainless steel over copper, aluminum 1100, aluminum 5052, silver, lead, phosphor bronze, invar, niobium, brass 70/30. They may be electro-plated with silver, tin, cadmium, gold or solder.

INNER CONDUCTOR: Silver plated copper, silver plated copper-clad steel, unplated copper, stranded copper, silver plated beryllium copper, aluminum, gold, lead, niobium, palladium, stainless steel, Tophet C[1], tungsten, tubular beryllium copper, silver plated tubular beryllium copper, silver plated tubular stainless steel, tubular stainless steel, silver tube over stainless steel tube.

DIELECTRIC OR INSULATING MATERIALS

Solid Teflon TFE[2], solid Teflon FEP[2], Teflon spline TFE, Tefzel[2], solid polyolefin, polyolefin foam, irradiated polyolefin, H film, polyvinylchloride, Mylar[2], magnesium oxide powder, aluminum oxide powder, Kynar[3], kel-F, silicone rubber, nylon.

MICRO-COAX DELAY LINES

Micro-Coax Delay Lines are a highly reliable method of providing short delays in radio frequency and microwave signals. They are available with delays of 5 to 100 nanoseconds as standard or custom units. Comprehensive test data is available on all Micro-Coax Delay Lines.

WAVEGUIDE DELAY LINES

UTI Waveguide Delay Lines are constructed of thin wall aluminum tubing supported by an alloy casting, and thus delay values are frequency sensitive. Waveguide delay lines offer greatly reduced loss when compared with coaxial types. Longer delays can be generated without intermediate amplification. A change in delay characteristics can be utilized to form a pulse compression network to use in calibrating radar, altimeters, and range finding equipment.

CERTIFIED WIRE FOR INDUSTRY

QPL *The largest and only "QPL" listed manufacturer of Polyethylene PVC, and Teflon® coaxial cable on the west coast to RG/U call-outs. Manufactured to the latest revision of MIL-C-17D.*

DESC and UL Approved
Approved in-plant test facilities by authorization of DESC and Underwriters Laboratories.

HOOK-UP WIRE

Victor Wire and Cable maintains a large inventory of several types of military and industrial hook-up wires. The military hook-up wires includes, among others — MIL-W-76 . . . MIL-W-5086A Type I, II, III, . . . MIL-C-7078A Type I, II . . . MIL-W-16878D Type B, B/N, C, C/N, D, D/N, E, EE, ET, J, JN, K, KK, KT . . . MIL-W-81044.

Industrial hook-up wires include UL Styles — 1004, 1007, 1011, 1012, 1015, 1061 . . . Hi voltage teflon® wire . . . business machine wire . . . Hi voltage Polyethylene wire . . . Kapton insulated wire . . . test lead wire . . . thermocouple wire.

If you have a special application Victor can design hook-up wire to meet your most exacting requirements.

COAXIAL CABLE

Victor Wire and Cable offers a complete line of Coaxial and Triaxial Cables that meet the requirements of Military Specification MIL-C-17. In addition Victor has designed hundreds of specialty coaxial cables to meet exacting electrical, mechanical, and environmental requirements — low capacitance . . . low attenuation . . . low noise . . . small overall diameter . . . low dielectric constant . . . high flexibility . . . high temperature . . . low temperature.

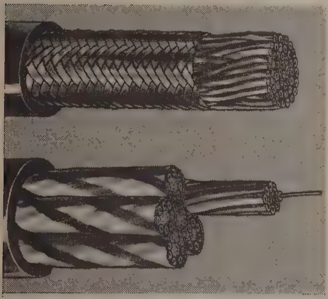
MULTI-CONDUCTOR CABLE



Victor has the capability to supply multi-conductor cable to exacting requirements to meet any environmental conditions. We have manufactured multi-conductor cables for almost every application — radar . . . closed circuit T.V. . . . color T.V. camera cable . . . remote control guidance . . . audio systems . . . monitoring equipment and community antenna systems.

Our Engineering staff is continually designing multi-conductor cables for specific applications. If you have a requirement for a special cable application — call VICTOR.

CABLE ASSEMBLIES

TERMINATIONS, MOLDINGS, HARNESSES

Victor Wire and Cable offers a service that is only equalled by the largest and most sophisticated cable companies. It is important to state that every production stage of termination, molding, and harnessing takes place at Victor Wire and Cable. Therefore we offer a quality controlled, in-house assembly program unequalled in the industry.

Victor Wire and Cable provides all types of termination and assembly work for Coaxial, Multi Conductor cable and harnesses with 100% accuracy and at low cost. Our custom engineering service is qualified to design cables, and cable assemblies to meet the most critical applications. Our customer guarantee is many years of experience.

YOUR COMPLETE SOURCE FOR FLAT INTERCONNECTS

Ribbon Cable

IC Interconnects

Custom Harnesses

A total source for flat interconnect systems, Woven Electronics produces woven cable assemblies to your specifications for conductors, spacing, insulation, color coding, marking—all requirements including special features such as breakouts, fold lines, tinning and connector terminations.

Simple jumpers to massive multi-layer programmed harnesses. Delivered in absolute conformance to your system requirements, ready for drop-in.

Flat woven cabling gives you broadest design capabilities, superior performance and control characteristics of individually insulated leads and precise positioning, without the restrictions of bonded or laminated forms.

CUSTOM CABLE-BILITY UNLIMITED

- Any quantity of leads, up to 400 and more
- Fast, easy lead exposure
- Combine varied sizes and conductor types
- Complete NEMA color code
- Programmed breakouts
- Leads pre-stripped and tinned
- Use standard or specialized connectors
- Any insulation, natural or synthetic
- Flexible, stackable, tackable
- Shielding and jacketing
- Expert technical assistance
- Design and testing services
- Rigid quality assurance

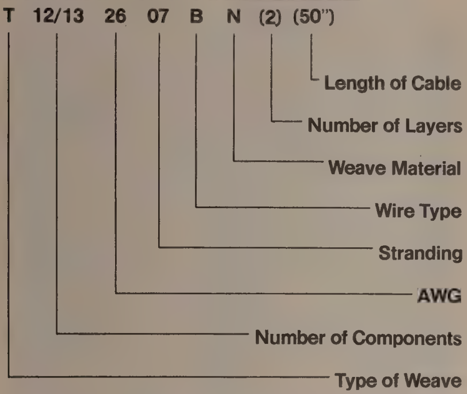
TWISTED SETS
Twisted pairs, triads and quads in single or multiple layers. Facilitates routing. Conserves space in packaging. Rugged and durable. Easy lead exposure without affecting adjacent insulations. Best method of ribbonizing TFE, FEP, polyimide, asbestos, fiberglass and other exotic insulations.

ULTRA-FLEXIBLE CABLES
Extreme flexibility achieved through the use of fine wire strands. Commonly used for in-movement interconnects. Withstands continuous flexing without delamination. Retains insulation continuity.

WOVEN ELECTRONICS

P.O. Box 189/Mauldin, South Carolina 29662
Phone (803) 963-5131/TWX-810-287-2091

ORDERING WOVEN CABLE



Six basic characteristics of woven cable are indicated by this numbering code.

Type of Weave

S—Standard Weave (plain and box weave)

T—Twill Weave

SpT—Stack Weave. Number in parentheses at end of order number designates number of layers.

A—Accordion Fold

PS—Programmed Standard

HS—Woven Harness

CIC—Matched Impedance

C—Covered Cable

Number of Components

Fold lines are indicated by /, between the number of components desired on each side of the fold line. More than one fold line may be indicated in this manner: 12/13/26/12.

TP following number of components indicates they are Twisted Pairs. TT are Traids.

AWG

Size of wire—22, 24, 26, 30, etc.

Stranding

Number of strands required to make up the AWG size.

Wire Type

Using letters from MIL-W-16878D, such as Type B, C, E, ET, EE. Or at this point show UL style of wire required—UL-1007, UL-1061, etc.

Weave Material

A full range of natural and synthetic binding fibers are employed in the production of woven cable—Kapton, Teflon, Nylon, Nomex, or natural blends of cotton and linen.

Most commonly specified:
N—Nylon
NX—Nomex
D—Dacron
Pp—Polypropylene
G—Glass

Number of Layers

When ordering stack-weave cable show number of layers, in parentheses, at end of numbering code.

Length of Cable

When ordering programmed cable (PS, HS, CIC), show length in inches, in parentheses, at end of numbering code. For special requirements, drawings and detailed notes may be used. Dimensional drawings are necessary for all harnesses, accordion fold units and programmed lead units.

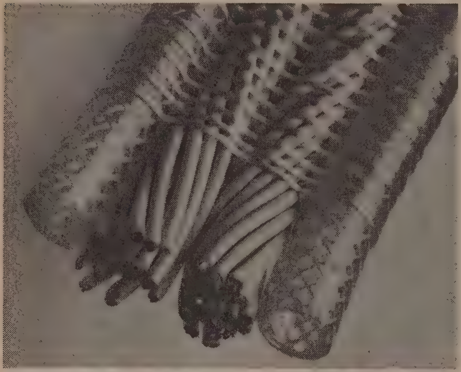
If a special array of conductors is needed, list and number each conductor. Indicate colors required. If using standard NEMA color code and repeat, simply note—"NEMA and repeat."

Woven-in, non-conductor area may be specified for folding and/or cutting. Cut line provides fastest method of lead separation, no hazards of tearing or damaging insulation. Fold lines facilitate compaction from flat to stacked single cable. Allows passage through small openings.

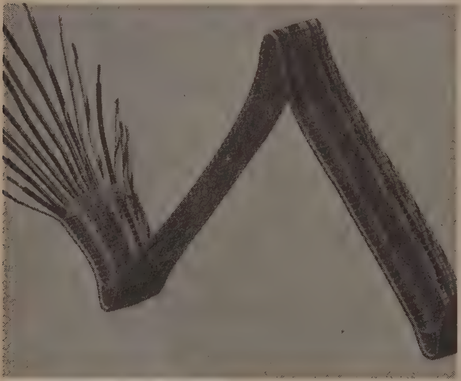
Minimum order	$50.00
Minimum length	100 feet

WOVEN ELECTRONICS

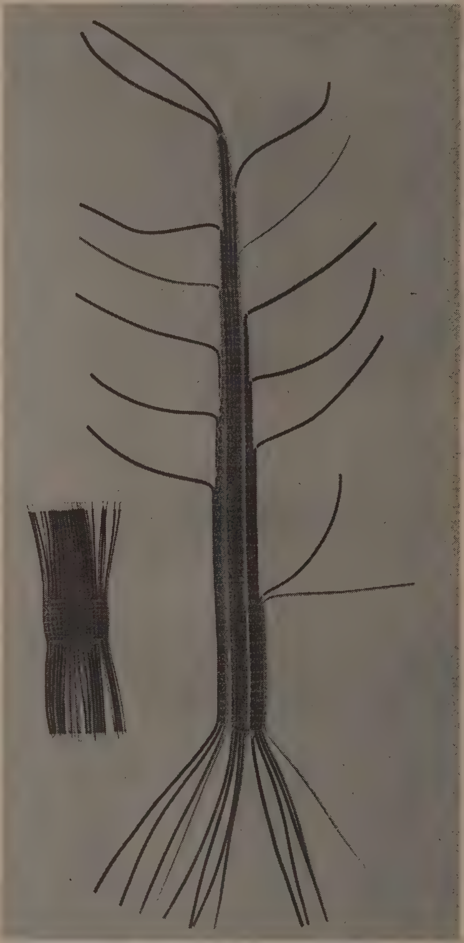
P.O. Box 189/Mauldin, South Carolina 29662
Phone (803) 963-5131/TWX-810-287-2091



MULTI-FUNCTION CABLES
Specialized assemblies for diverse industrial applications. Air, liquid or gas carrying tubes may be woven in a package with electrical conductors. Organize fiber-optic bundles to distribute data—multiple light-emitting diode arrays, etc. Combine varied conductor sizes and functions.



ACCORDION FOLD
Permanently pre-folded. Strain-relief threads at each fold prevent flexing fatigue of conductors. Reinforced edges prevent wear from drawer movements or other obstructions. Any length. Allows varied combinations of conductor types, color, groupings, insulations.

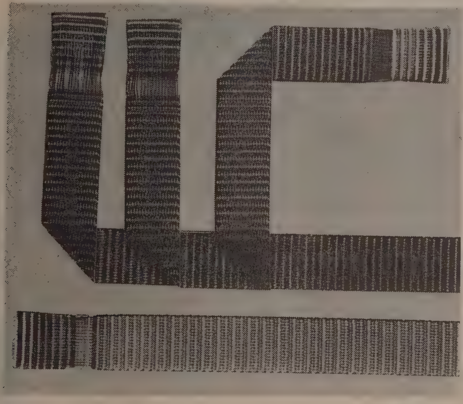


CUSTOM HARNESSES AND JUMPERS
Woven and/or hand-tied to properly match application requirements. Specifically designed and manufactured for your needs. Complete with branches, breakouts, and terminations—connectors as specified. Fully equipped, tooled, ready to plug in. Programmed jumpers for point-to-point hookup.

WOVEN ELECTRONICS

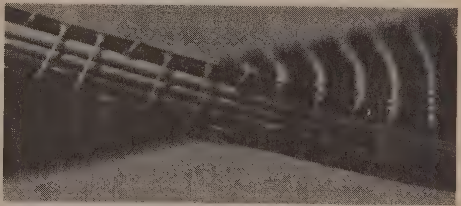
P.O. Box 189/Mauldin, South Carolina 29662
Phone (803) 963-5131/TWX-810-287-2091

STRAIN-RELIEF TABS
Woven-in as part of cable or harness. Tack, epoxy or fasten tab to secure cable in place. Protects termination by relieving pressure from conductor ends.



MATCHED IMPEDANCE CABLE
Replaces laminated circuitry to provide increased computer efficiency with less cable bulk. Impedance controlled to less than 10% deviation in acceptable ranges. Fold, roll, twist without delamination or appreciably changing impedance. Configuration of signal lines and position of ground planes minimize crosstalk. Lengths and leads pre-programmed for your application.

INTERCONNECT ASSEMBLIES
Complete IC Interconnect assemblies with standard connectors. Tighter signal control. Higher performance reliability and durability at competitive price levels.



STACK WEAVE CABLES
Multiple layers of parallel lay or twisted sets organize conductors in tight, space-saving pattern. Programmed array maintains precise lead orientation. Conductors of varied sizes, functions and insulations are combined with no risk of tearing or splitting.

METHODS DESIGNED FOR BETTER QUALITY AND BETTER SERVICE

An important feature in maintaining the quality of our products is our ability to design and construct the tools necessary to do the job. We guarantee continuous performance of equipment & continuity of production.

The exacting specifications of Whitmor's space-age customers require a stringent quality assurance program. Our Q.C. meets Mil-Q-9858 & Mil-I-45208 with modifications required by customers. The same quality consciousness is applied to commercial work. We guarantee trouble free cable and wire!

Whitmor has what it takes to build cables for tough jobs!

20,000 square feet housing modern, high speed equipment makes it possible to fill orders on a 24 hour basis, if required.

WHITMOR WIRE AND CABLE CORPORATION

*Designate jacketing desired as follows: V=vinyl X=Dur-X-thane P=polyethylene N=neoprene - Mil-S-6855 - Class 2 - Grade 60
EXAMPLE: W-1827P=Cable w/27 conductors, 18 gauge wire, w/polyethylene jacketing. **Add "S" to PART NO. for Shielded cable.
Other constructions available on request using 1/32″ PVC insulation (3000 V, Military Type D); (600 V, Style 1015 U.L. Commercial)

TECHNICAL DATA

Whitmor Wire and Cable Corporation manufactures a complete line of multiple conductor control cables. All conductors are Type C per MIL-W-16878, insulated for 1000 V and 105° C. Conductors are color coded per MIL-STD 681. All conductors are planetary cabled and contra-helically laid with Mylar tape over the cable bundle.

® Dur-X-thane is Whitmor's Registered T.M. for extruded Polyurethane.

SHIELDED CABLES: Same specifications as above with additions of tinned copper braided shield over cable complex with 85%-95% coverage to MIL-C-7078A, cables shipped on non-returnable reels.

MANUFACTURERS AND SALES OFFICES DIRECTORY

This index provides an alphabetical listing of manufacturers supplying electronic equipment, instrumentation, components, materials and fabrication services. Included for each company are addresses, phone numbers, TWX numbers where applicable, selected distributors, and who to contact for information on pricing, applications and customer service. A condensed list of products made by the company appears below each name, as well as Federal Supply Code (FSC) numbers, Qualified Parts List (QPL) numbers and minimum order data. When available, free literature is also listed.

Boldfaced listings indicate those manufacturers who have provided catalog data in the white pages of EEM. Volume numbers appear first, before the bullet, the page number is listed after it. Many companies have placed their representative symbol before their names as an aid to identification.

Free literature available: Allen-Bradley NC Series 4000 and CNC 7300 systems provide full capability for all turning, milling and maching center applications. The numerous features and available options are descibed in two NC brochures. Programmable Controller is expandable, easily programmed by ladder diagrams, and self-checking. Bulleting 1774 discusses solid-state control features and modular construction for memory (up to 8K) and inputs/outputs (1,024) available. Bulletin 1750 and 1755 describe the two versions of PMC. Read-only and Read-write memory are available.

Products manufactured: Controllers, Programmable, Controls/Control Eqpt.

AMERICAN ZETTLER, INC. cont'd

Advertisment

Alois Zettler, a Swiss company, is one of the largest relay and switch manufacturers in Europe. American Zettler, a wholly owned subsidiary, follows the traditional Swiss observance of quality and precision. Assembly and checkout facilities in the United States are staffed by highly skilled and experienced circuit analysts who are on call to assist you in specifying any relay or switch application. A complete stock of products assures you of immediate, off-the-shelf delivery. Our engineers will be glad to provide you with free samples of American Zettler relays and switches and discuss your problems at no cost or obligation. Simply call or write one of the Sales-Engineering Representatives listed, or contact our headquarters in Irvine, California.

AMERSIL, INC., 685 Ramsey Ave., Hillside, N.J., 07205, Tel: 201-688-4500; Empl.: 100; Minimum order: $25

Customer service: Sls. Dept.

Free literature available: Amersil Price list EM-9503-3 Covers a complete line of fused quartz and fused silica products designed to meet the exacting specifications required by the electronic industry.

Products manufactured: Machines/Machinery, Production, Quartz, Fused, Silica, Fused, Substrates, Tubing

Free literature available: Pocket Magnetometers; Enclosed Demagnetizers; Open Style Demagnetizers; Audiophile Han-D-Kits; Notes on Demagnetizing; Split Core C.Ts; Hi-Flux Magnetic Equip.; Products; Dymograph Balancers; Special Magnetic Equip.

Products manufactured: Coils Including Assemblies & Forms, Demagnetizers, Erasers, Magnetic Tape (Bulk), Indicators, Magnetizers, Magnetometers, Meters, Power Supplies, Recorders, Tape Recording Accessories, Transformers

Advertisment

DEMAGNETIZERS Annis Demagnetizers available from small hand held units to heavy industrial types. Over 1000 varieties to choose from.
MACHINES, BALANCING Precision Annis Dynograph Balancers for production balancing of smaller rotors.
METERS, GAUSS Measure magnetic residuals in tape recording equipment, tools & steel parts.
TRANSFORMERS, INSTRUMENT Annis Split Core Current Transformers. Ranges from 150 to 6000/5 amperes. Six sizes. Will operate direct writing recorders.

Free literature available: Autosplice a new splicing system that operates from a continuous spool of spliceband material. In one simultaneous action the machine feeds a length of this spliceband, cuts it and forms it and crimps it around the items to be assembled. Insulsplice - the only machine in the world that operates from a plastic laminated metal strip, and both makes and attaches insulated splices at the same time.

Autopin - this machine operates from a continuous coil of either round or square wire and inserts pins into printed circuit boards, bobbins, etc. Autotab - production machine that inserts pre-stamped terminal directly into printed circuit boards, components, etc.

Products manufactured: Backpanel Interconnect Systems, Clamps & Clips, Connectors, Contacts, Electrical, Fasteners, Forms, Wire, Jumpers, Laminates, Machines/Machinery, Production, Pins, Services, Assembly, Production & Test, Splicers, Coaxial Cable, Splices, wire (Including, Butt & Cap Types), Terminal Blocks, Boards & Strips, Terminals, Tools, Wire, Wire & Cable Ties, Wire Nuts

Advertisment

Designer and manufacturer of High Voltage Connectors and Cable Assemblies.
Our specialty is Corona Free and also Watertight Connectors.
These products find applications in copying machine, CRT terminals, ion implantation equipment, Laser equipment, Power supplies, radar X-ray equipment, Xenon flashers, nuclear equipment.
Connectors are single and/or multi-pin; Coaxial, Triaxial; Molded on types;
Quick disconnects or Field assembled. We invite your inquiries.

Advertisment

DIRECTIONAL COUPLERS, COAXIAL AND WAVEGUIDE, designed to produce DC or RF outputs sensitive to forward and reflected main line RF power. Your most exacting "SPECIAL" RF power measuring requirements can, in most cases, be satisfied by but a slight modification of one of our hundreds of standard models. Meet MIL Specs.

Why do so many firms, both large and small, come to Dattilo Enterprises, Inc. for design, layout, and complete printed circuit assemblies. The answer is simple. We do more than anyone else in the industry to help you with your individual circuit needs. We provide weekly status reports to keep you up-to-date with your RFQ or Purchase order. We do not offer excuses, only fast, concise information or solutions. We have established our reputation on superior quality at reasonable prices. For complete printed circuit assemblies from design to finished product; remember our name. We would be pleased to add your company to our constantly growing list of satisfied customers. If the above sound to good to be true.......try us, you will be very pleasantly surprised.

Customer service: A. Abeles

Free literature available: General Catalog (36 pages) lists lead-mounted rectifiers, bridges, multipliers and other high-voltage rectifiers. Also lists Mosfets. Bridge Reference Guide-cross index showing comparison between GI's and competitors' bridges.
Silicon Rectifier cross reference guide. Lists over 1000 JEDEC and competitors' lead-mounted rectifiers replaceable with reduced number of GI units.

Products manufactured: Amplifiers, Circuits, Hybrid, Thick Film, Circuits, Hybrid, Thin-Film, Circuits, Integrated, Silicon Monolithic, Unpackaged Chips, Comparators, Converters, Current Sources, Decoders, Decommutators, Telemetering, Detectors, Diodes, Drivers, Solenoid, Drivers & Decoders For Readouts, Equalizers, Filters, Hybrid Voltage Regulators, Integrated Circuit Packaging Systems, Integrated Circuit Devices, IC's, Active Filters, Integrators, Electronic, Inverters, Memory Systems, Mixers, Modulators, All Kinds, Modules, Logic, Encapsulated, Monitors, Multiplexers, Multipliers, Oscillators, Power Drivers, Hybrid (High Current, High Voltage), Power Supplies, Rectifiers, References, D-C Voltage, Regulators, Relays, Shifters, Switches, Synchro Transmitters, Solid-State, Timers, Transistors

Why share your EEM?

The 1975-76 edition of EEM contains more than 4,400 pages of detailed product data from over 700 manufacturers of electronic products. A proven valuable catalog/directory for the working engineer, EEM also contains:

- ☐ a product index listing of more than 3,000 product headings
- ☐ an alphabetical listing of manufacturers, listing their mailing address, key sales personnel and sales offices, representatives and distributors
- ☐ a trade mark directory matching the company name with the trade mark and a description of the product
- ☐ a distributor directory of all the leading electronic distributors listed geographically.

To be sure you won't be faced with the problem of standing on line to use your company's EEM, order your own copy today!

Send check or money order to:
